

Captura superficial y palangrera en el OPO

EPO surface and longline catches

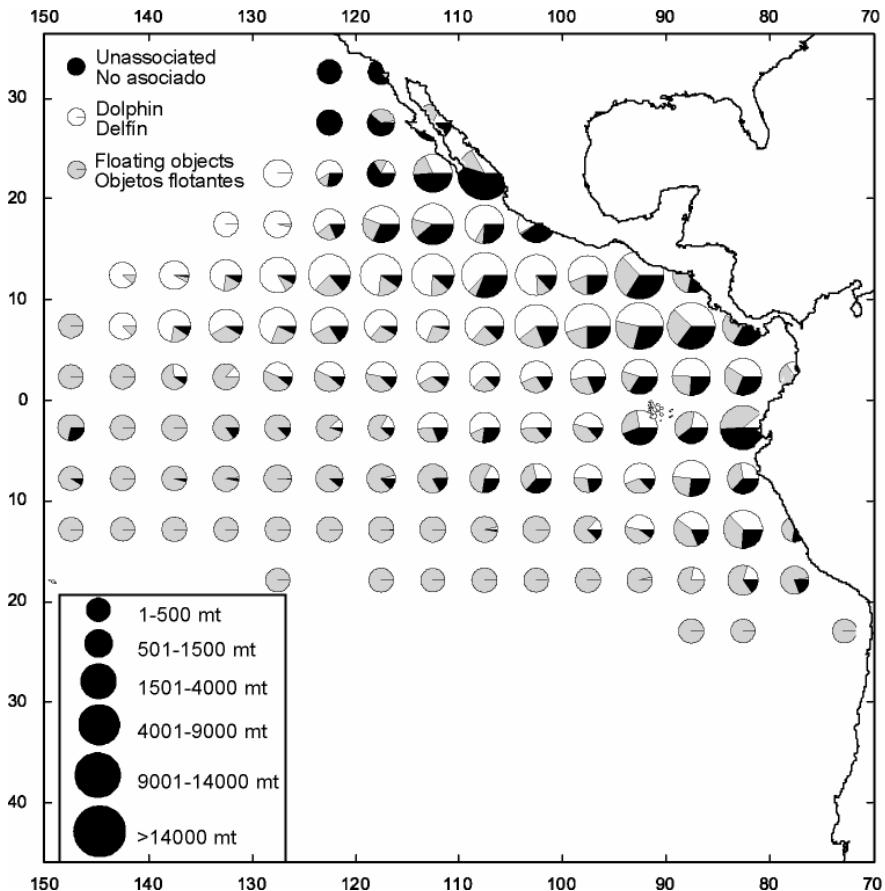

Capacidad acumulativa en el mar

Cumulative capacity at sea

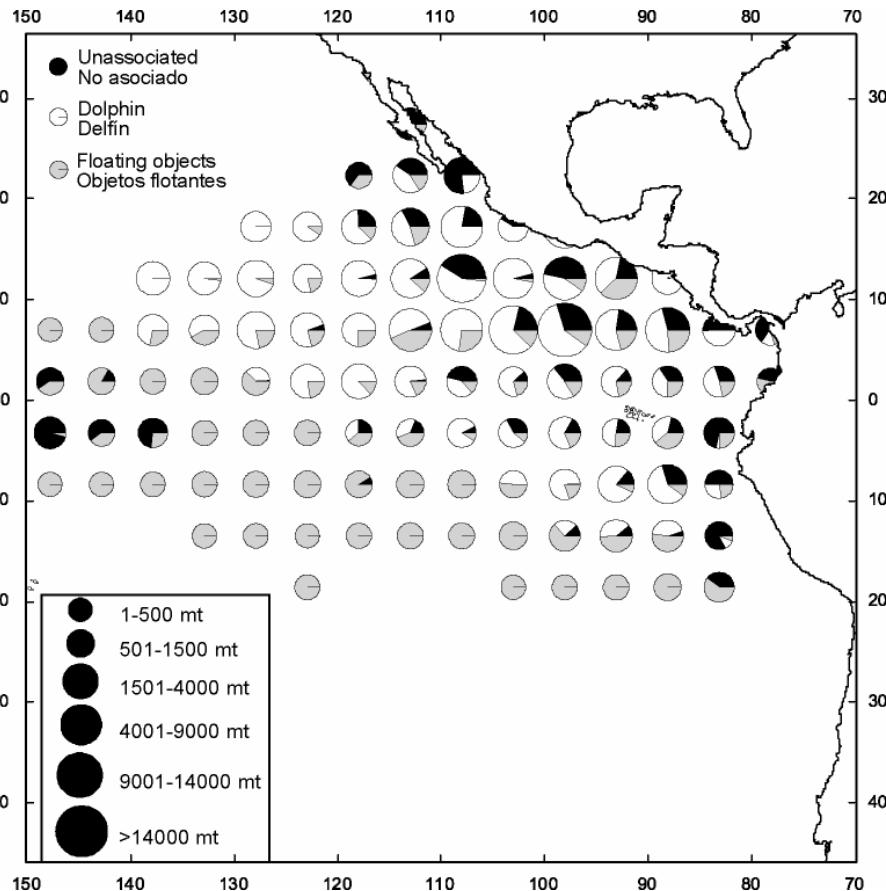

Atún aleta amarilla – Yellowfin tuna Capturas en bitácora – Catch logged

Prom – Ave 1987-2001

**268,000 t – mt
(219,000 a – to 396,000)**

2002

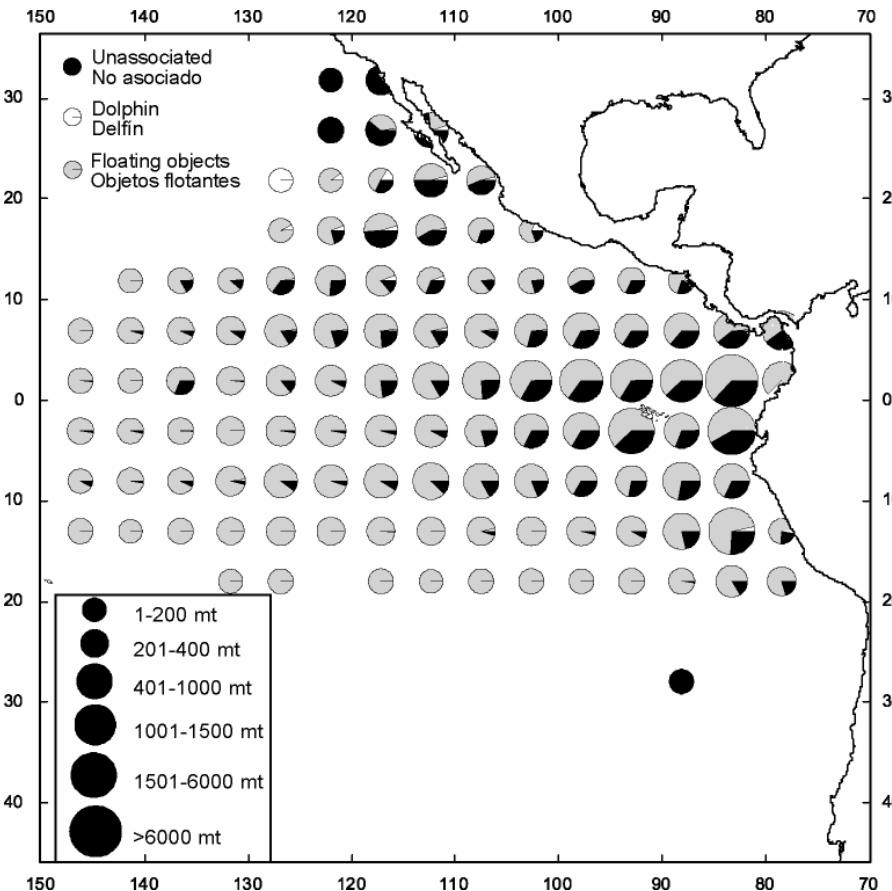

**419,000 t – mt
56% mayor – higher**

Atún barrilete – Skipjack tuna

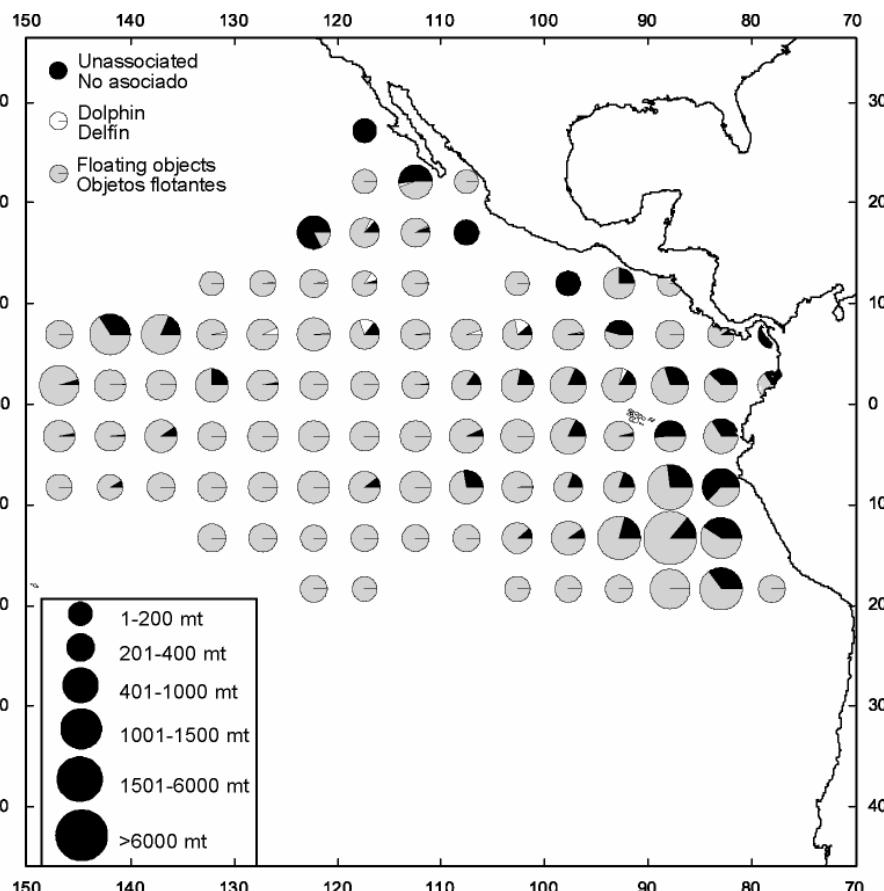

Capturas en bitácora – Catch logged

Prom – Ave 1987-2001

120,000 T – mt
(62,000 a – to 266,000)

2002

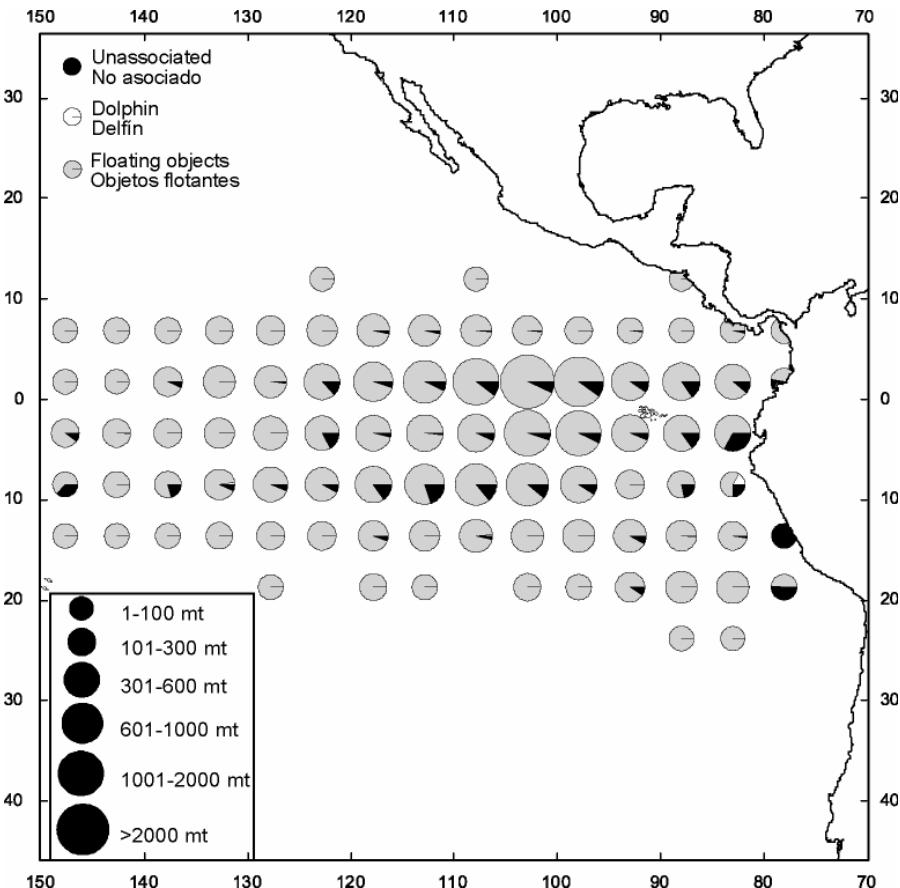

158,000 T – mt
32% mayor – higher

Atún patudo – Bigeye tuna

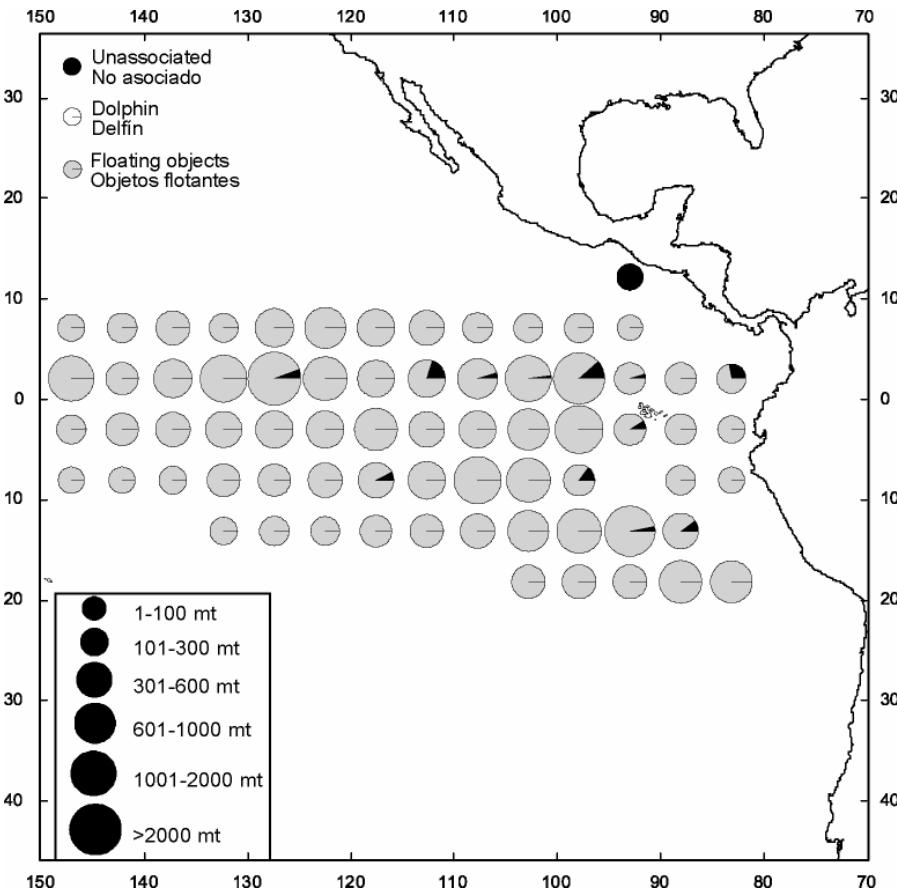

Capturas en bitácora – Catch logged

Prom – Ave 1987-2001

**44,000 T – mt
(29,000 a – to 70,000)**

2002

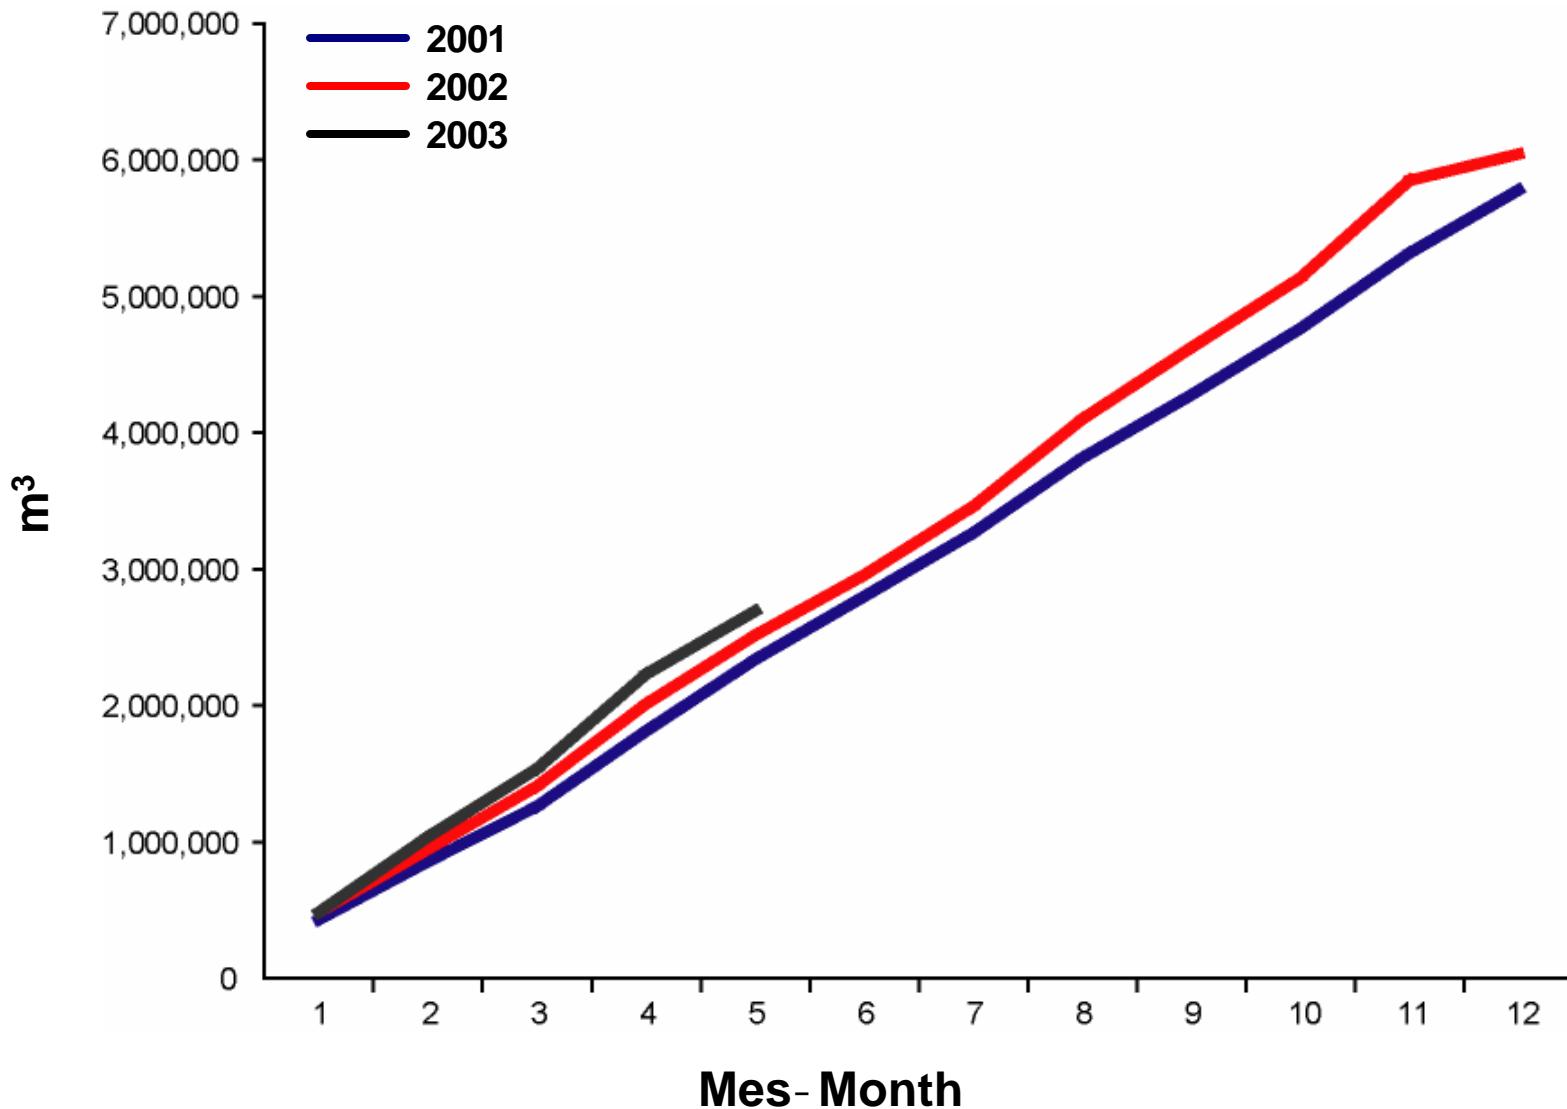

**35,000 T – mt
21% menor – lower**

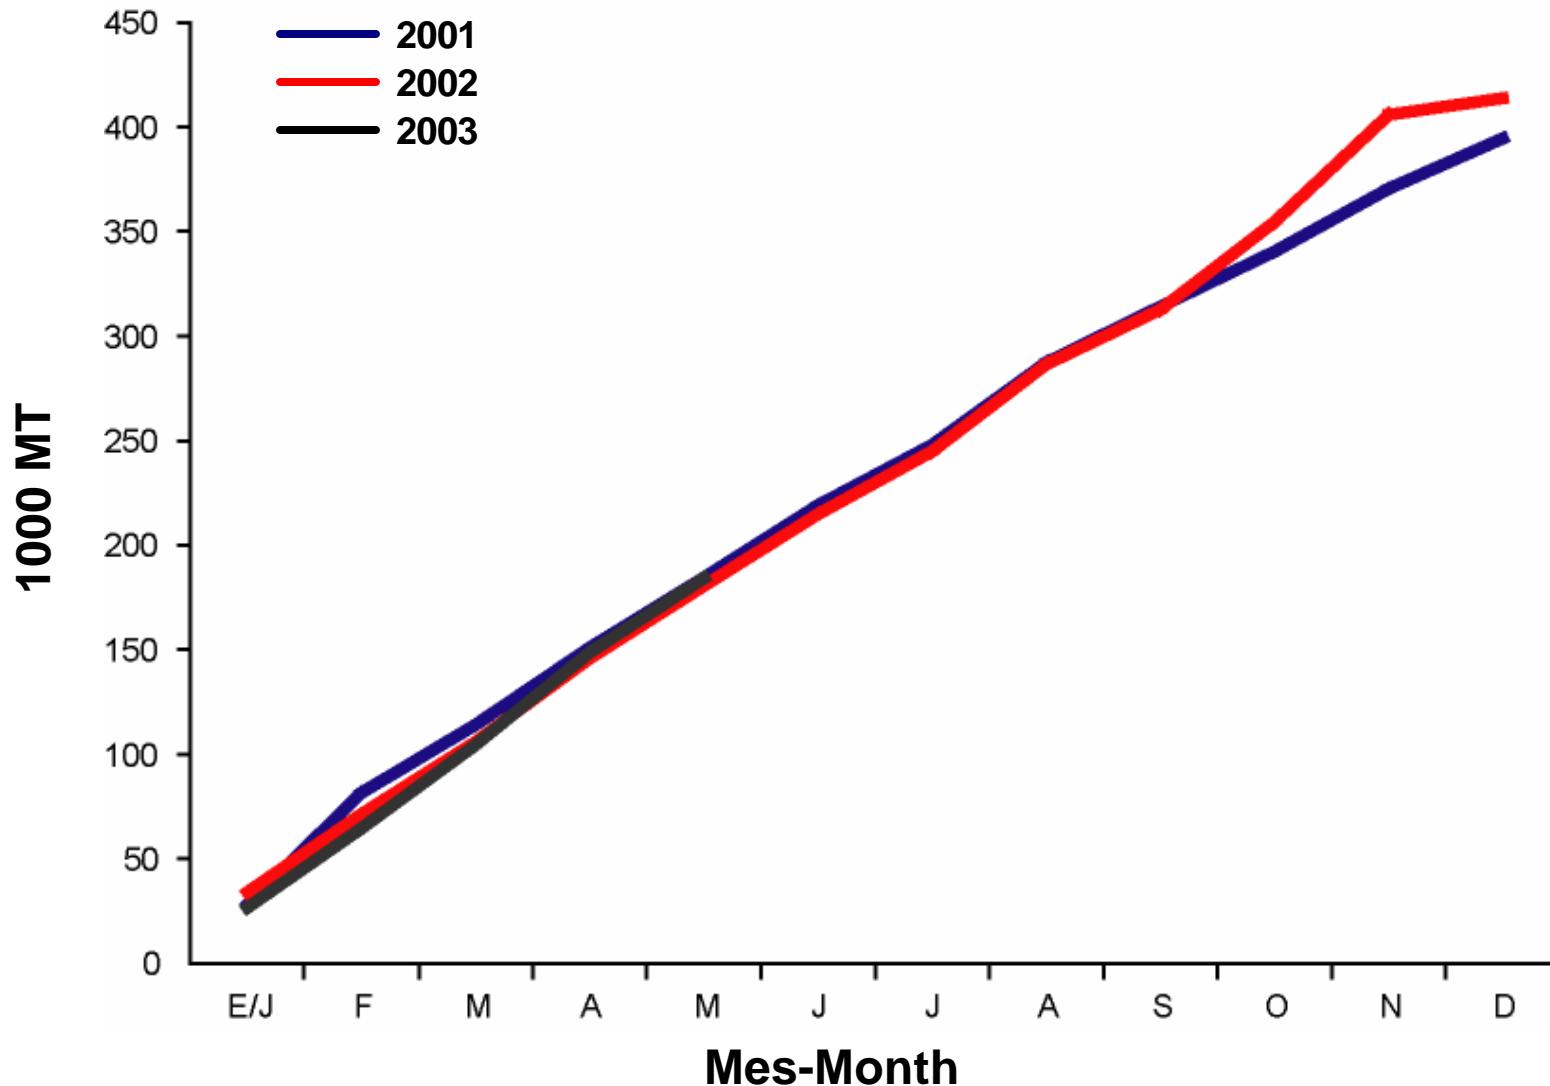

Capacidad acumulativa en el mar

Cumulative capacity at sea

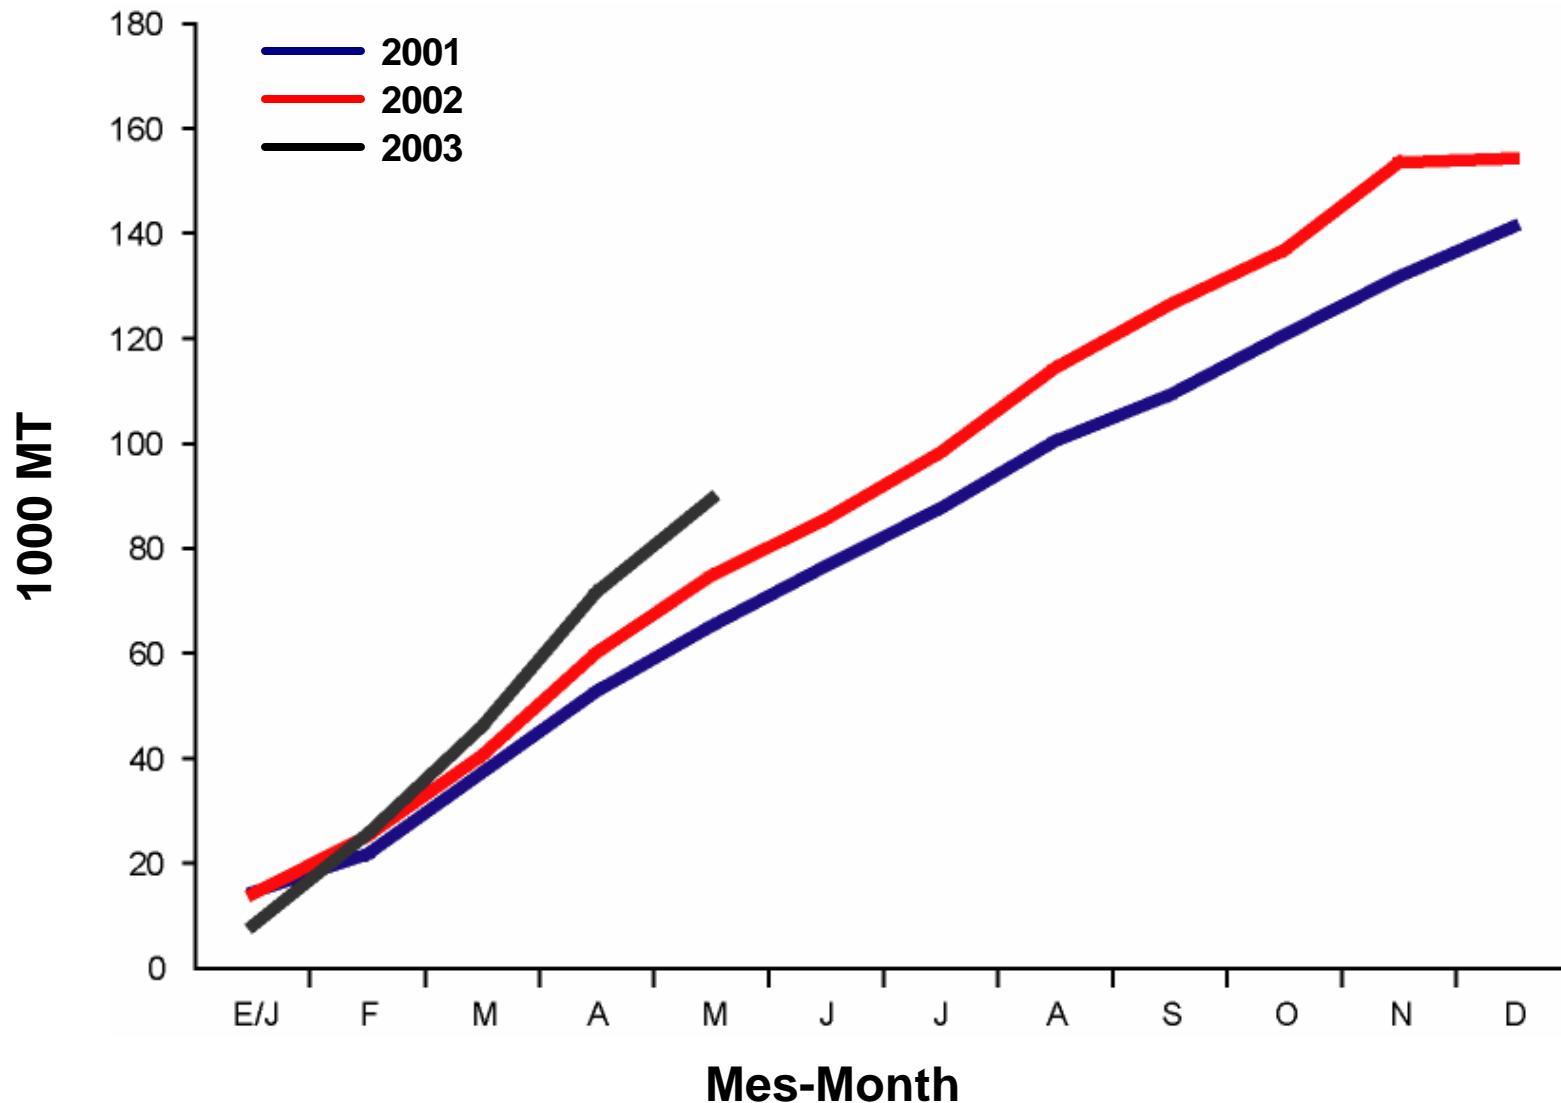

Captura acumulativa de YFT

Cumulative catch of YFT

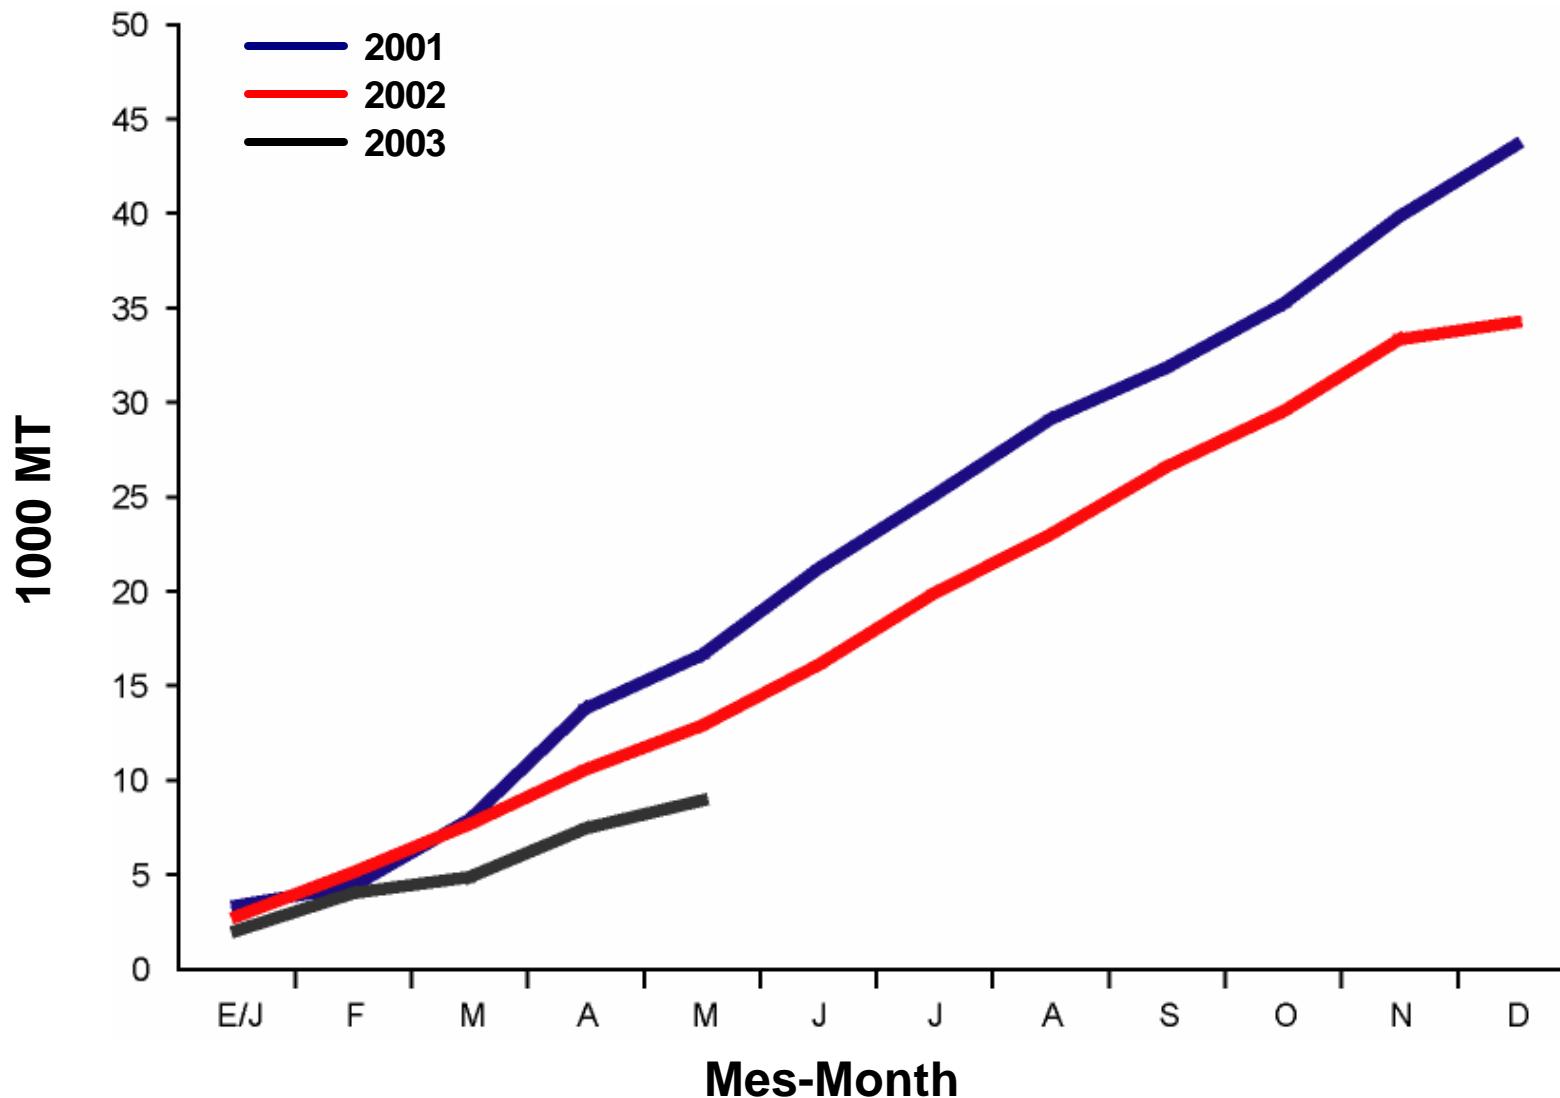

Captura acumulativa de SKJ

Cumulative catch of SKJ

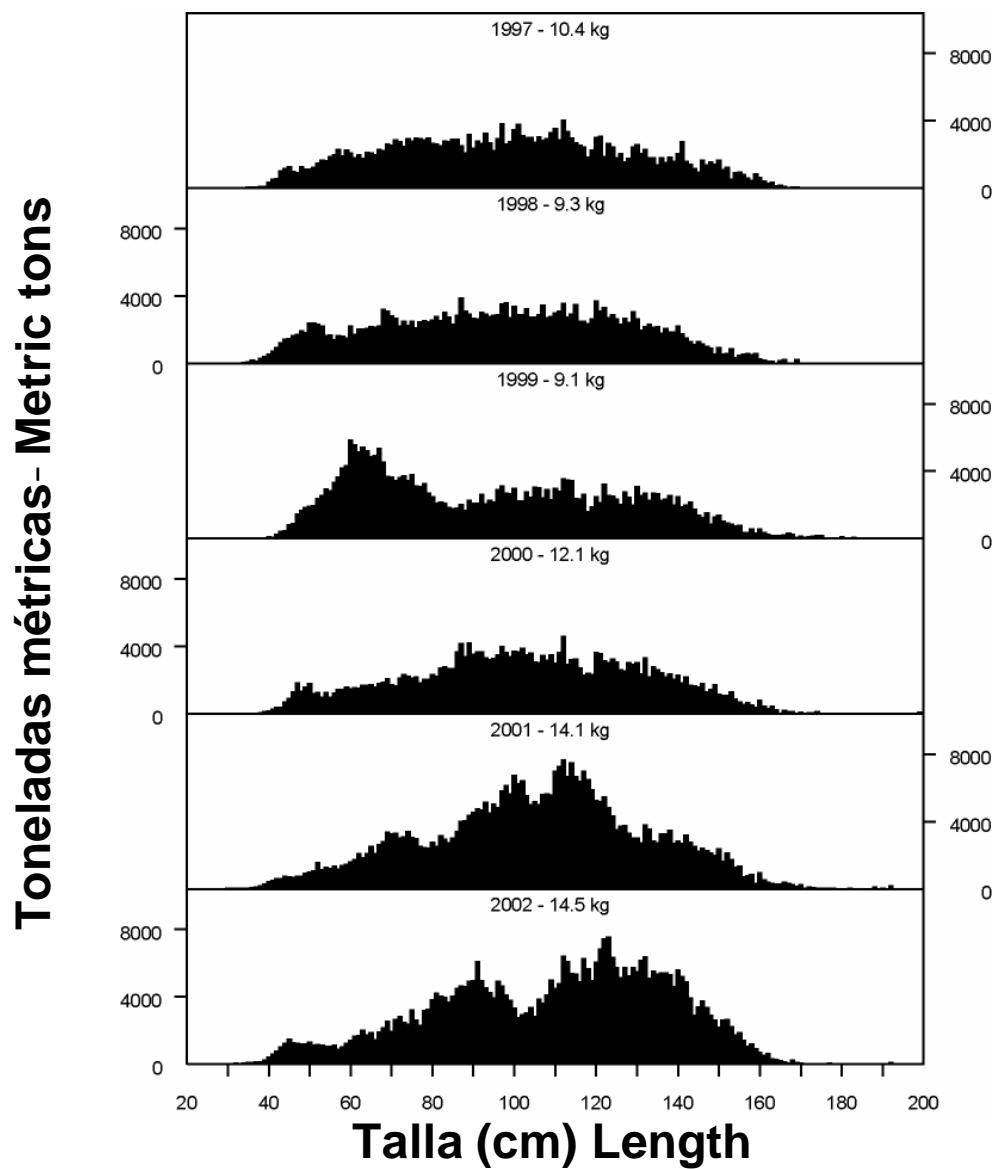

Captura acumulativa de BET

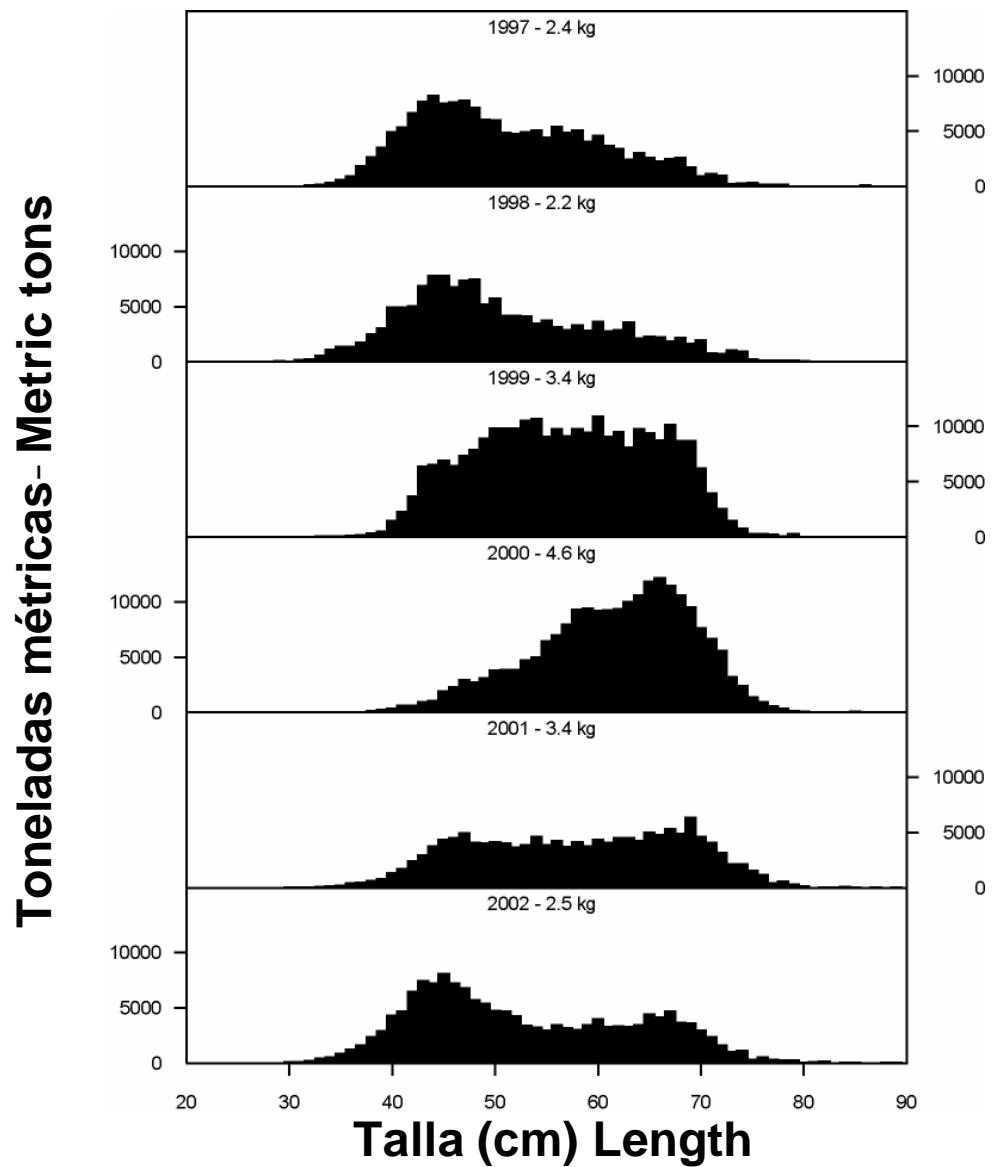

Cumulative catch of BET

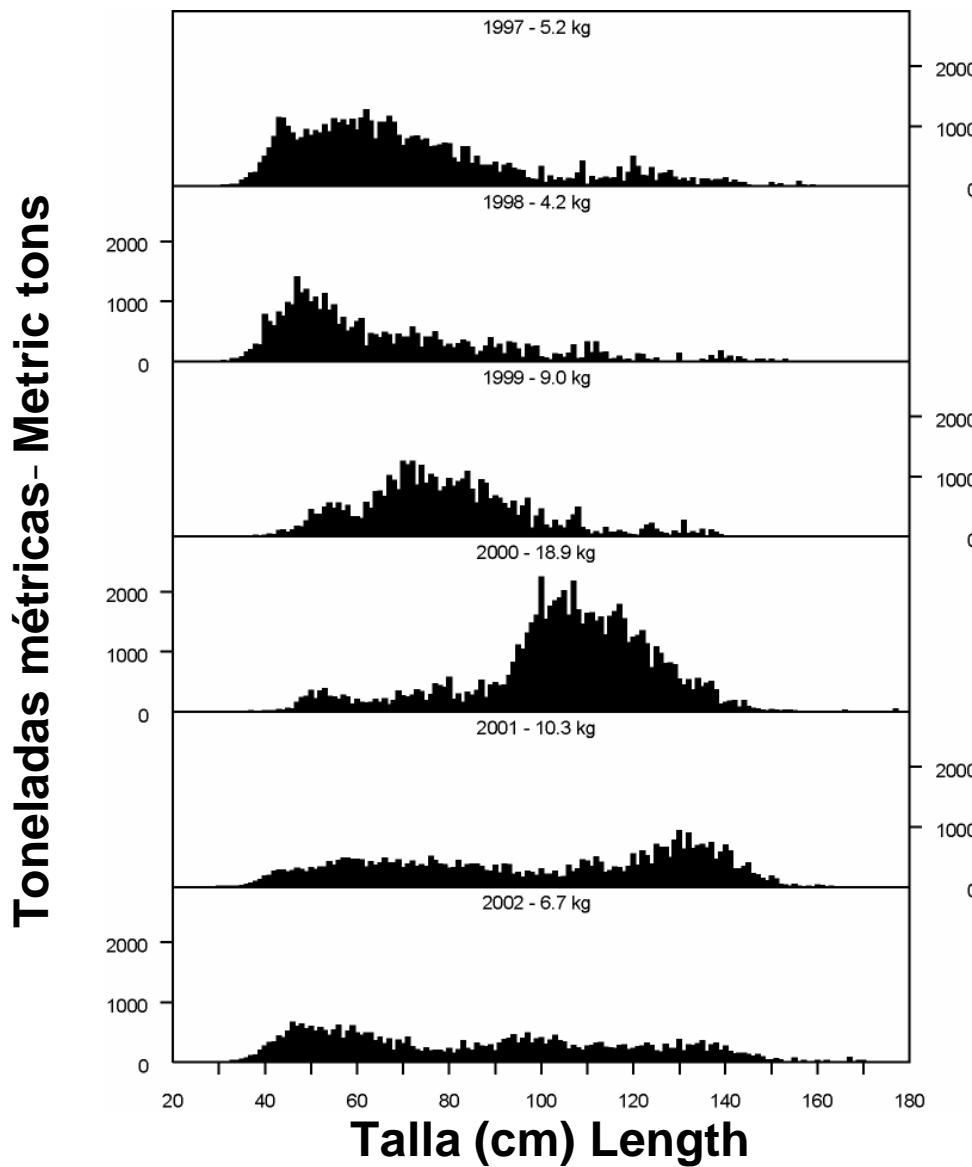

Atún aleta amarilla- Yellowfin tuna

Atún barrilete- Skipjack tuna

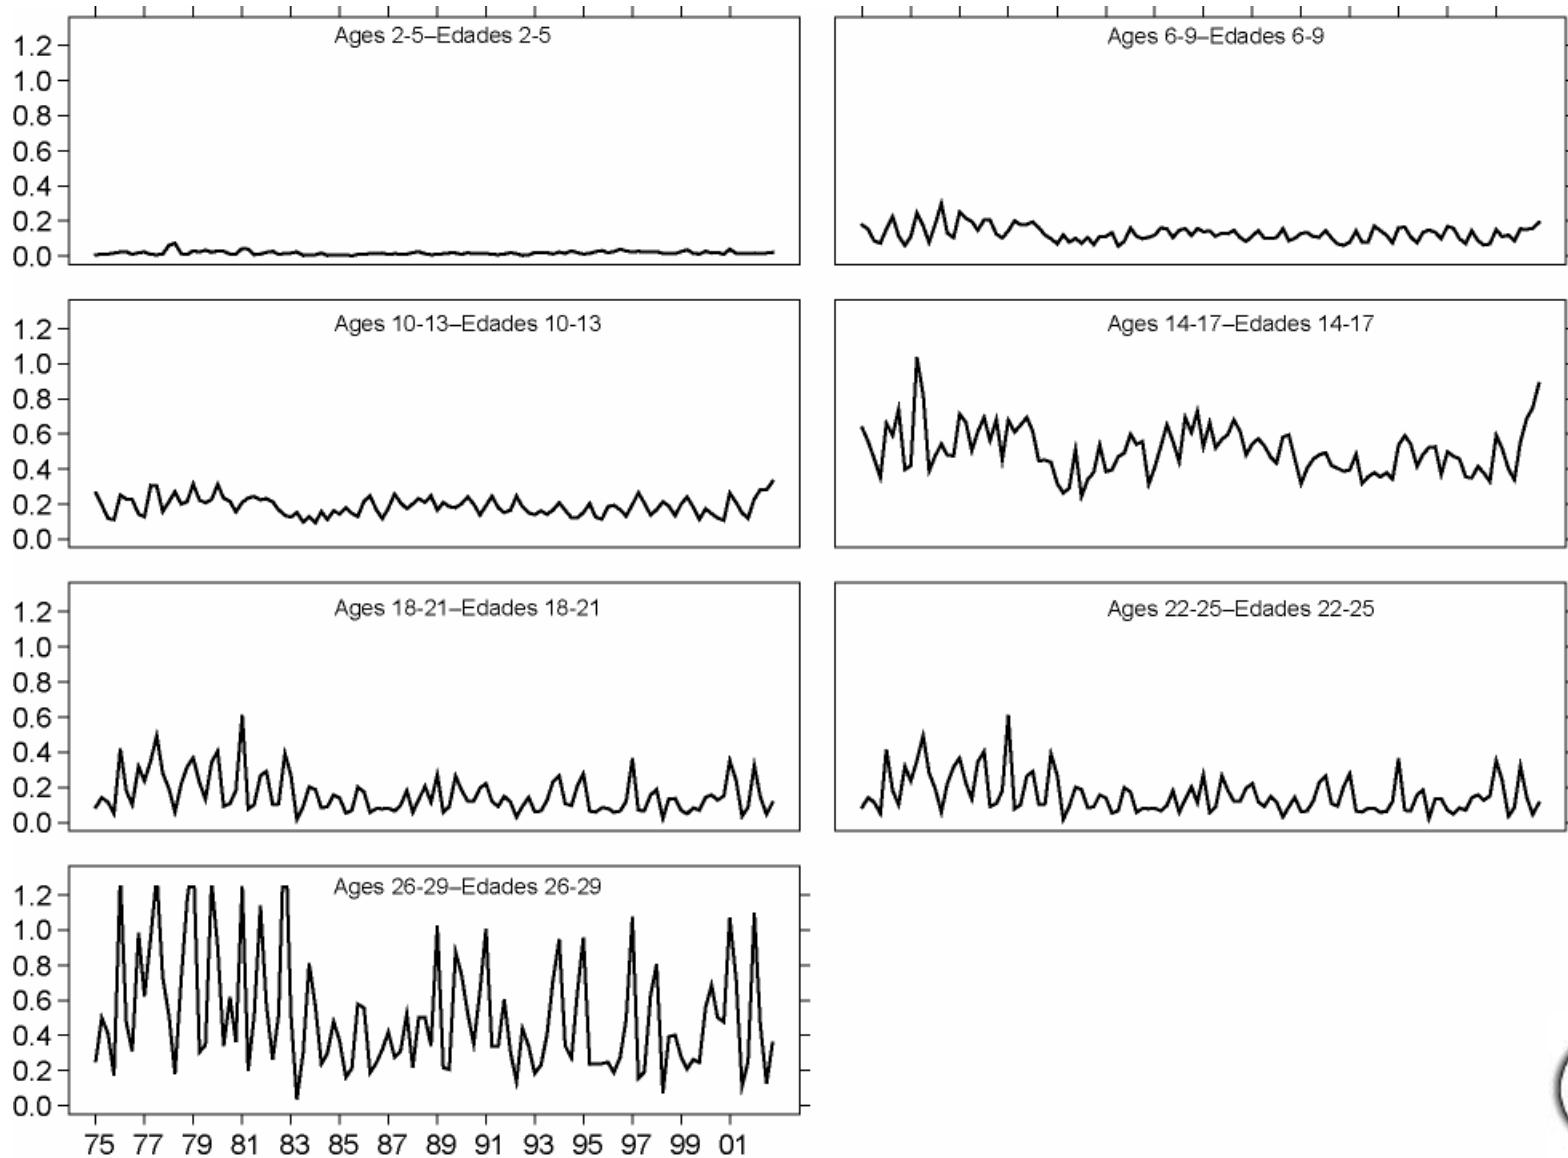

Atún patudo- Bigeye tuna

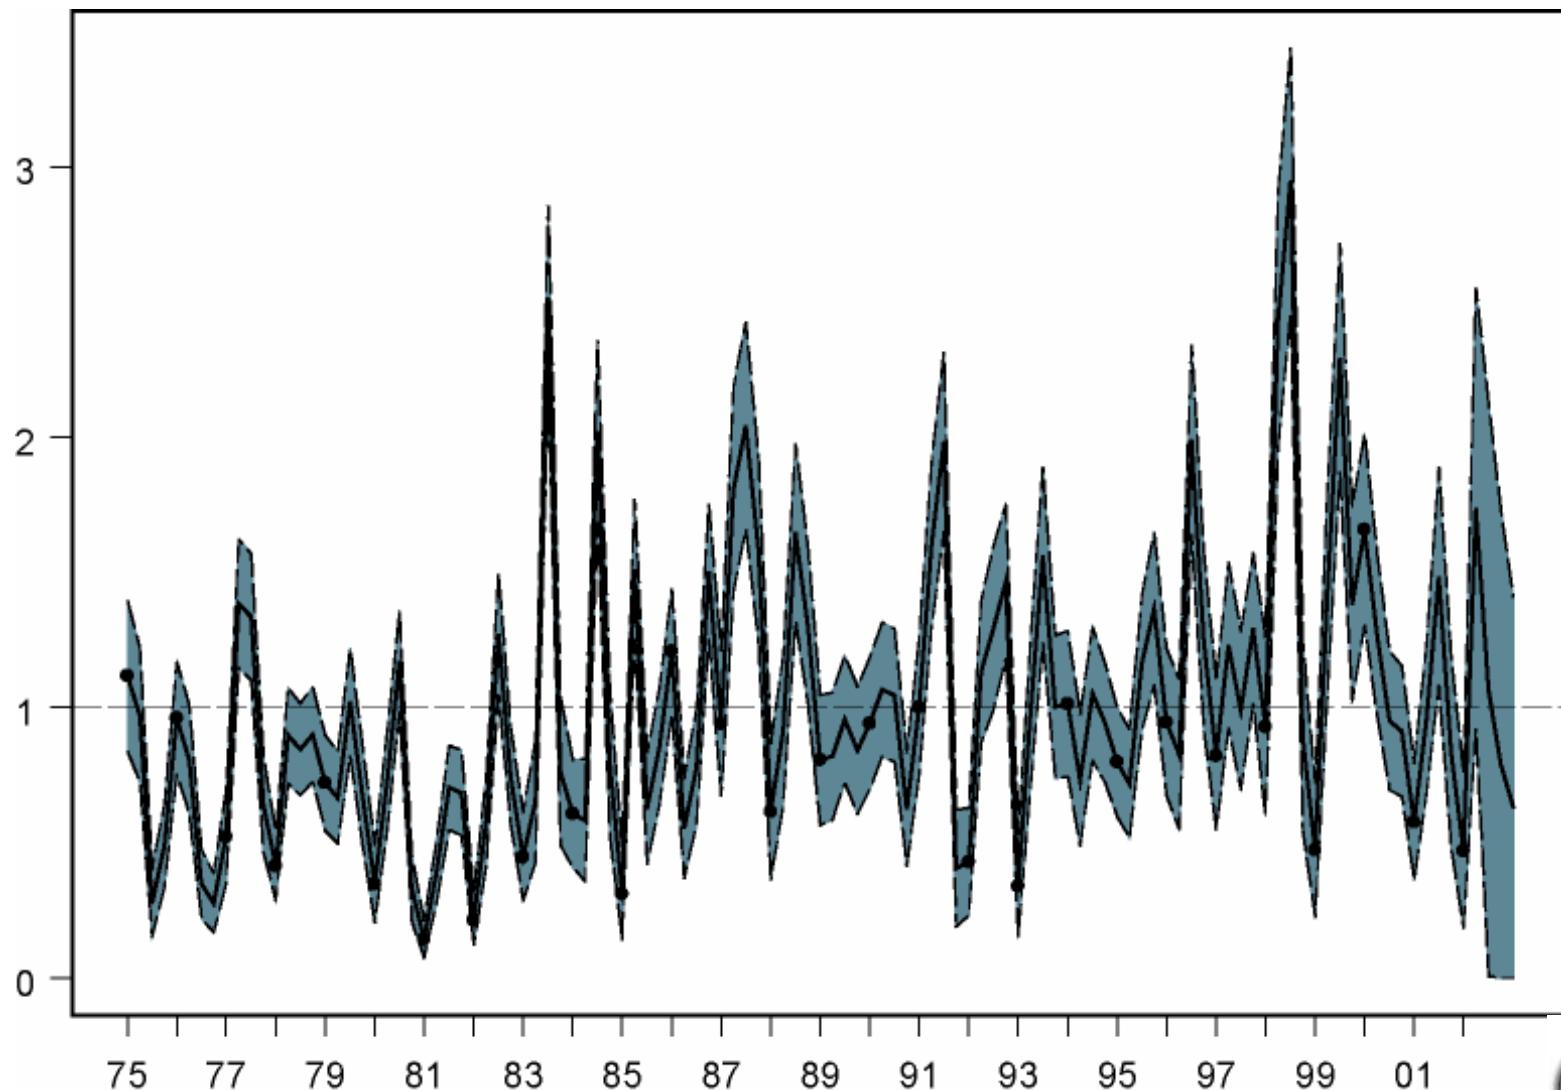

Atún aleta amarilla- Yellowfin tuna

Promedio de F_{total} - Average total F

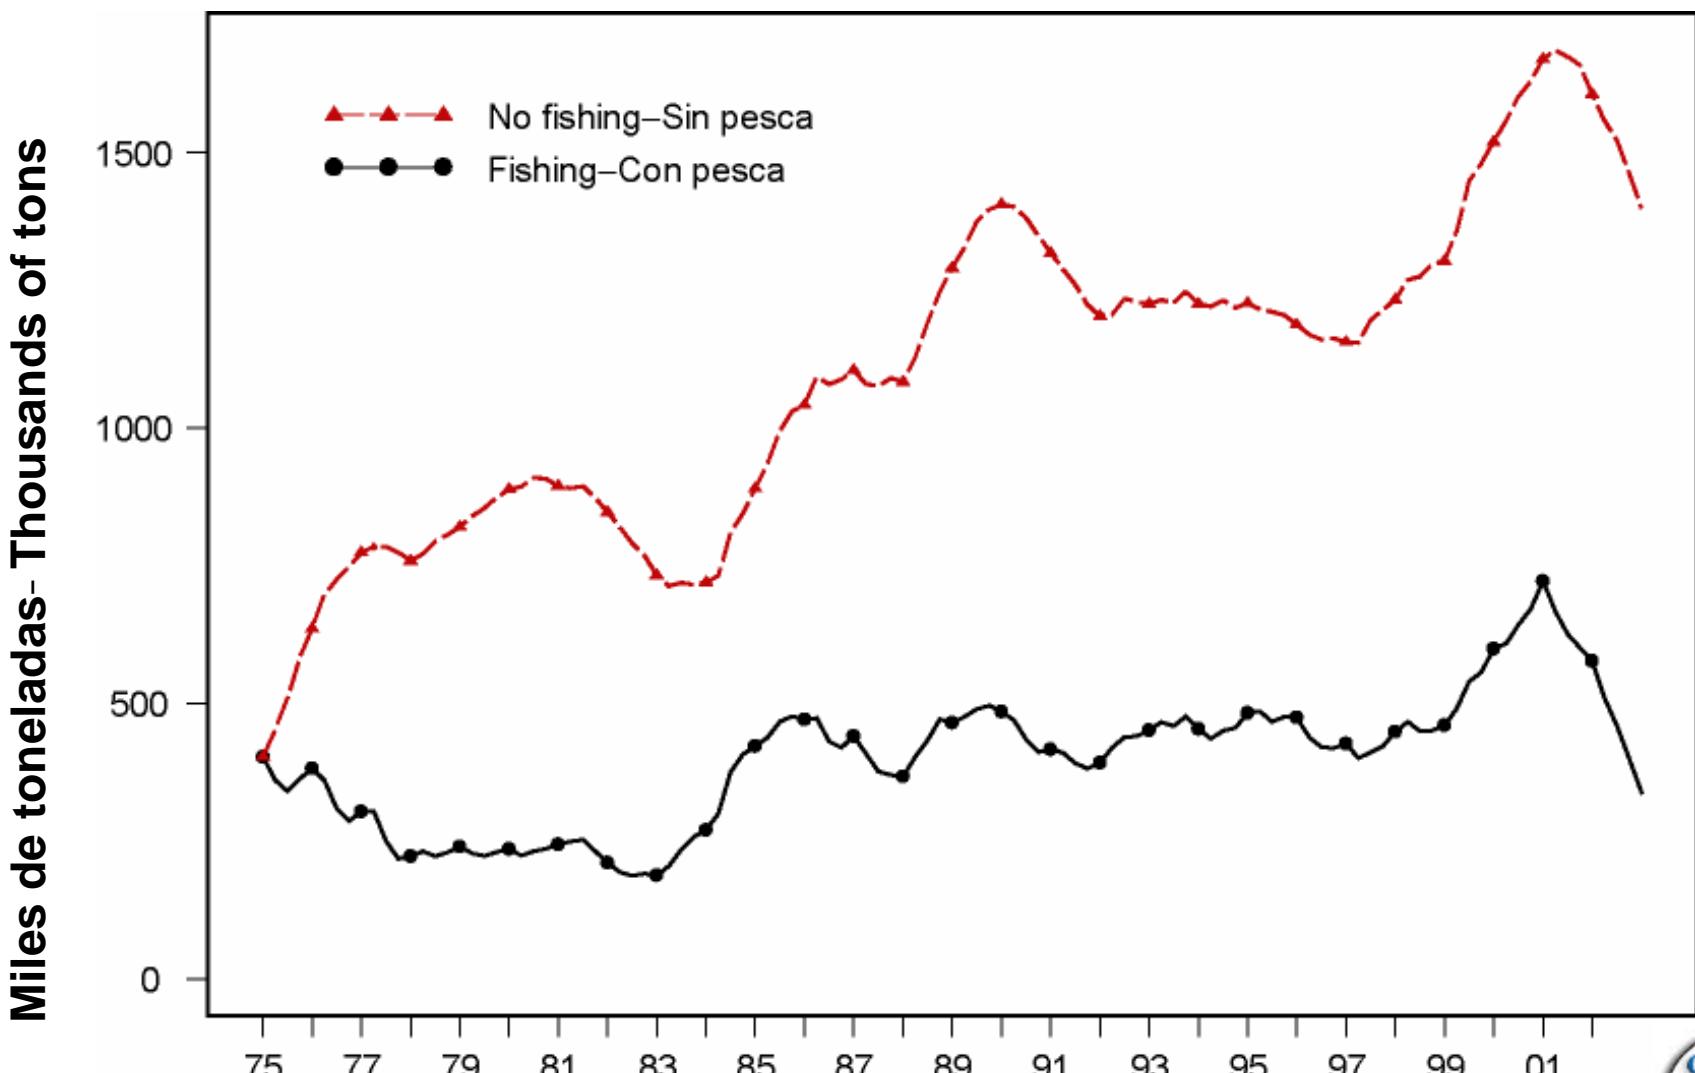

Atún aleta amarilla- Yellowfin tuna

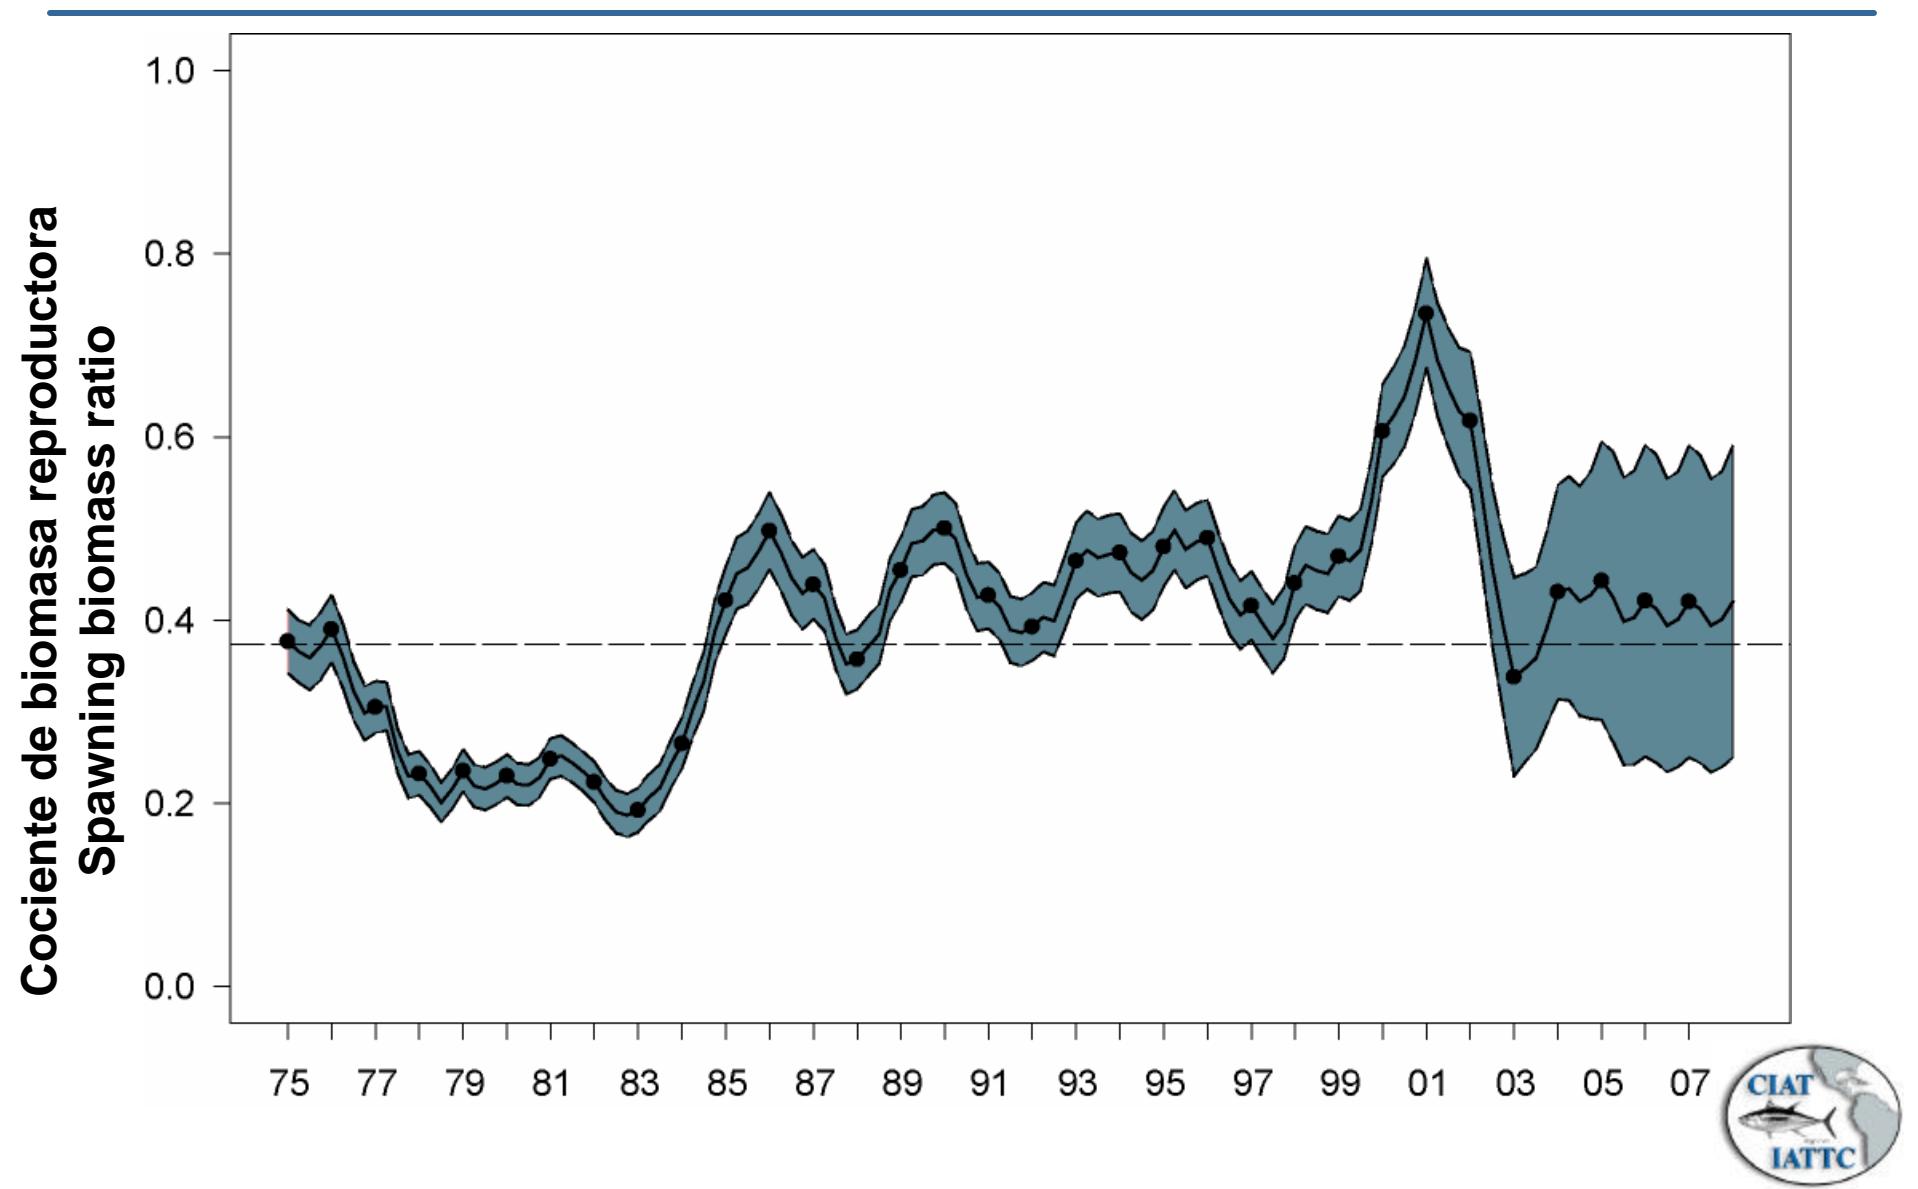

Reclutamiento relativo- Relative recruitment

Atún aleta amarilla- Yellowfin tuna

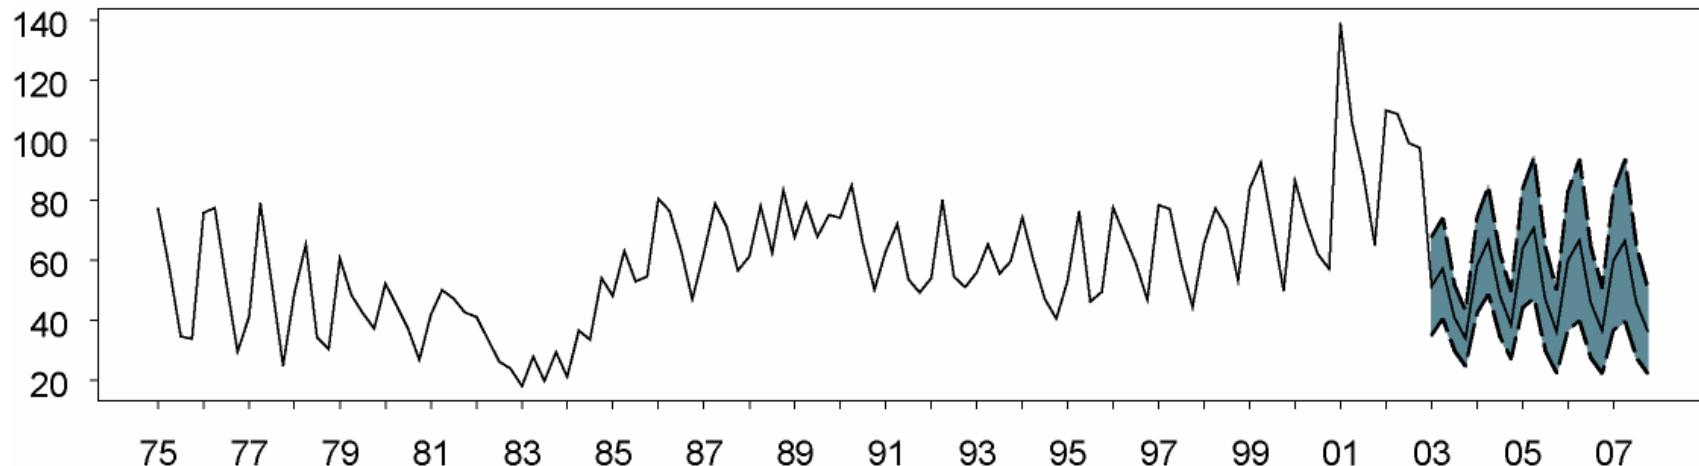

Atún aleta amarilla- Yellowfin tuna

Atún aleta amarilla - Yellowfin tuna

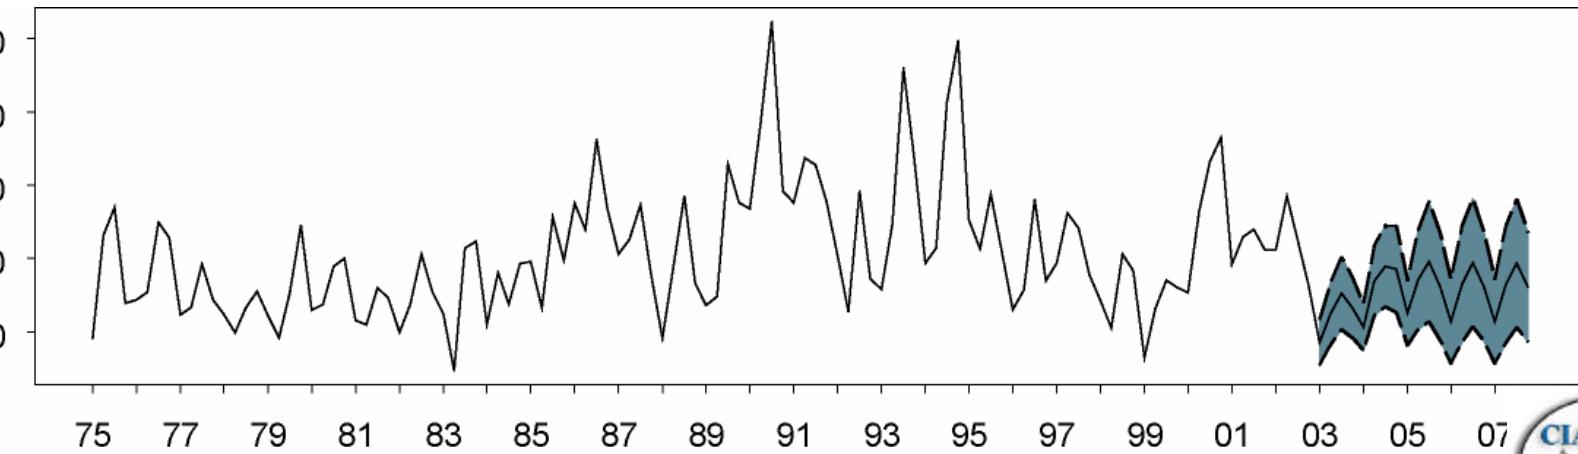

Captura- Catch ('000T)

Captura cerquera predicha- Predicted purse seine catches

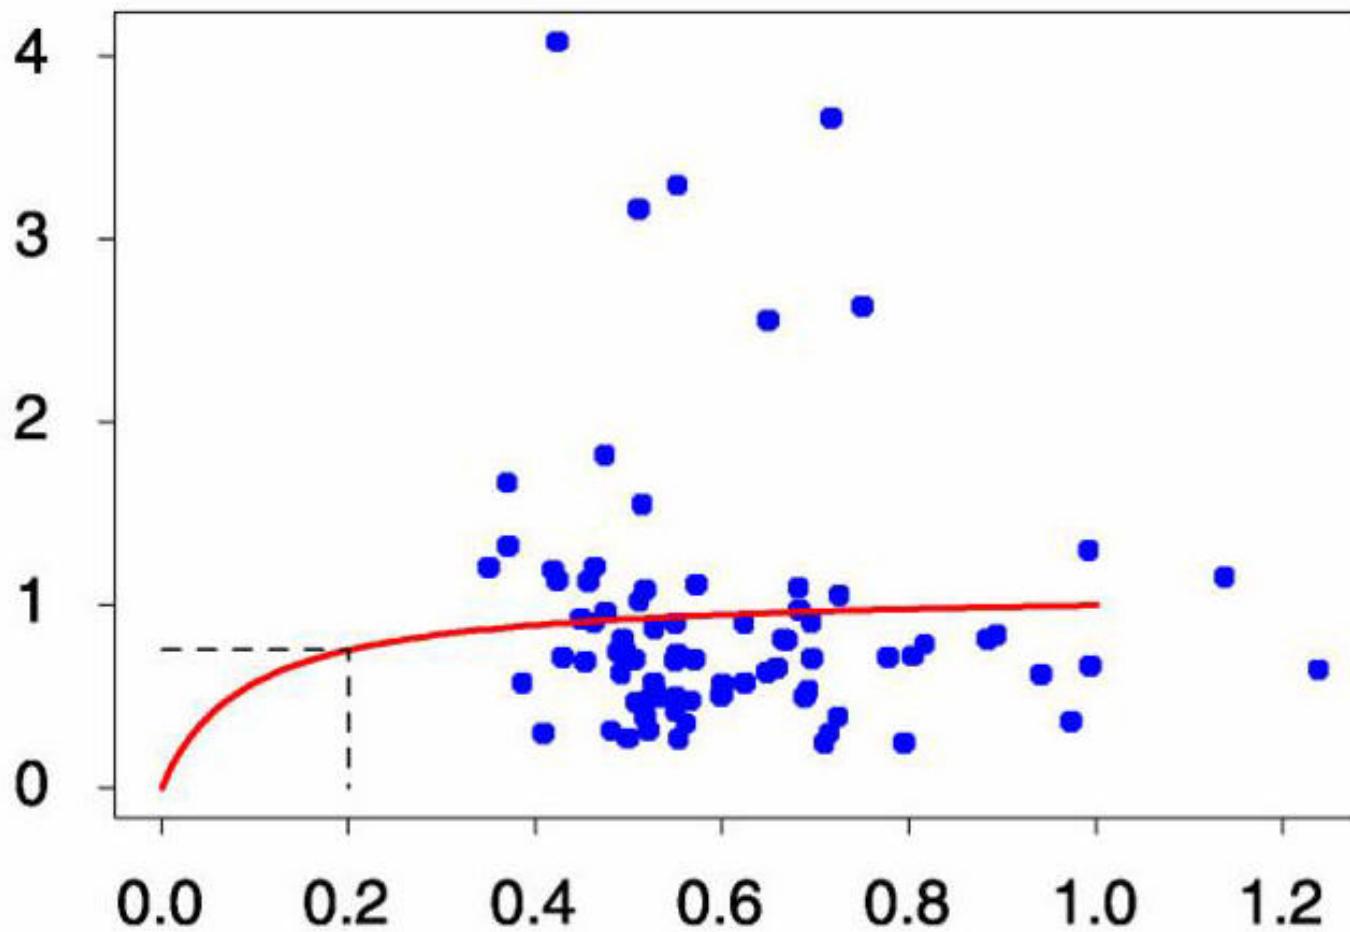

Captura- Catch (miles
de peces- '000s fish)

Captura palangrera predicha- Predicted longline catches

Reclutamiento – Variables explicatorias

Recruitment – Explanatory Variables

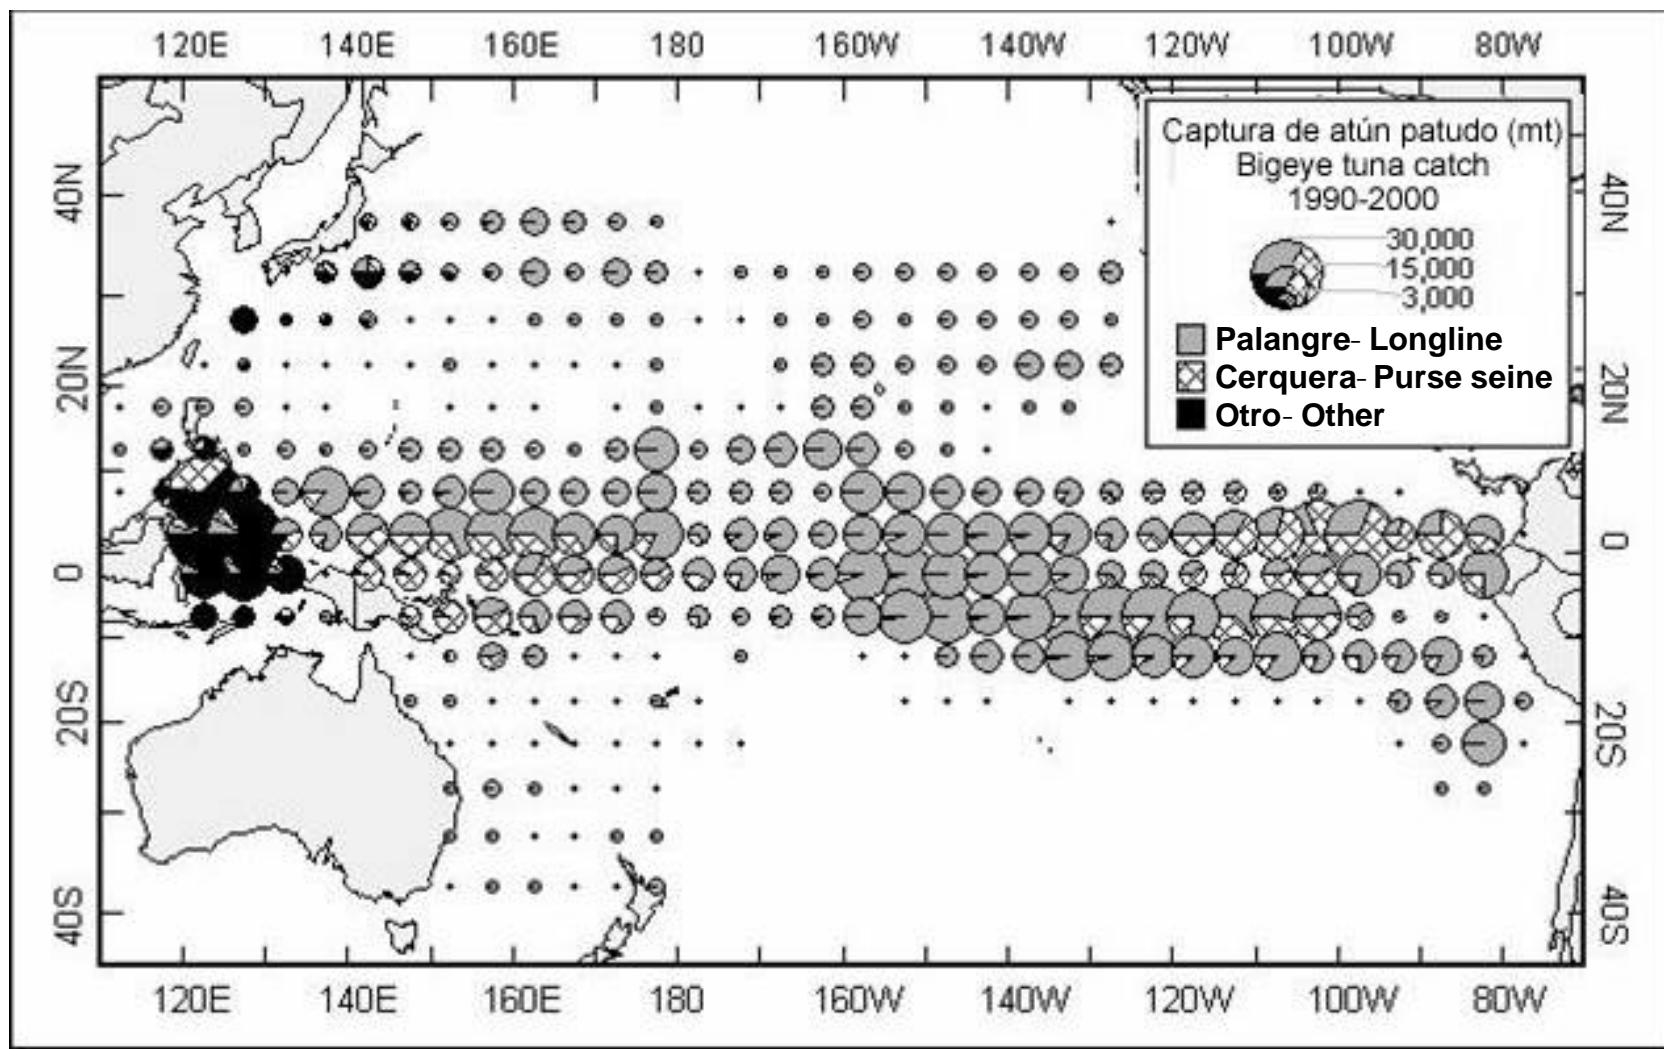

BIOMASA RELATIVA DE REPRODUCTORES
RELATIVE SPAWNING BIOMASS

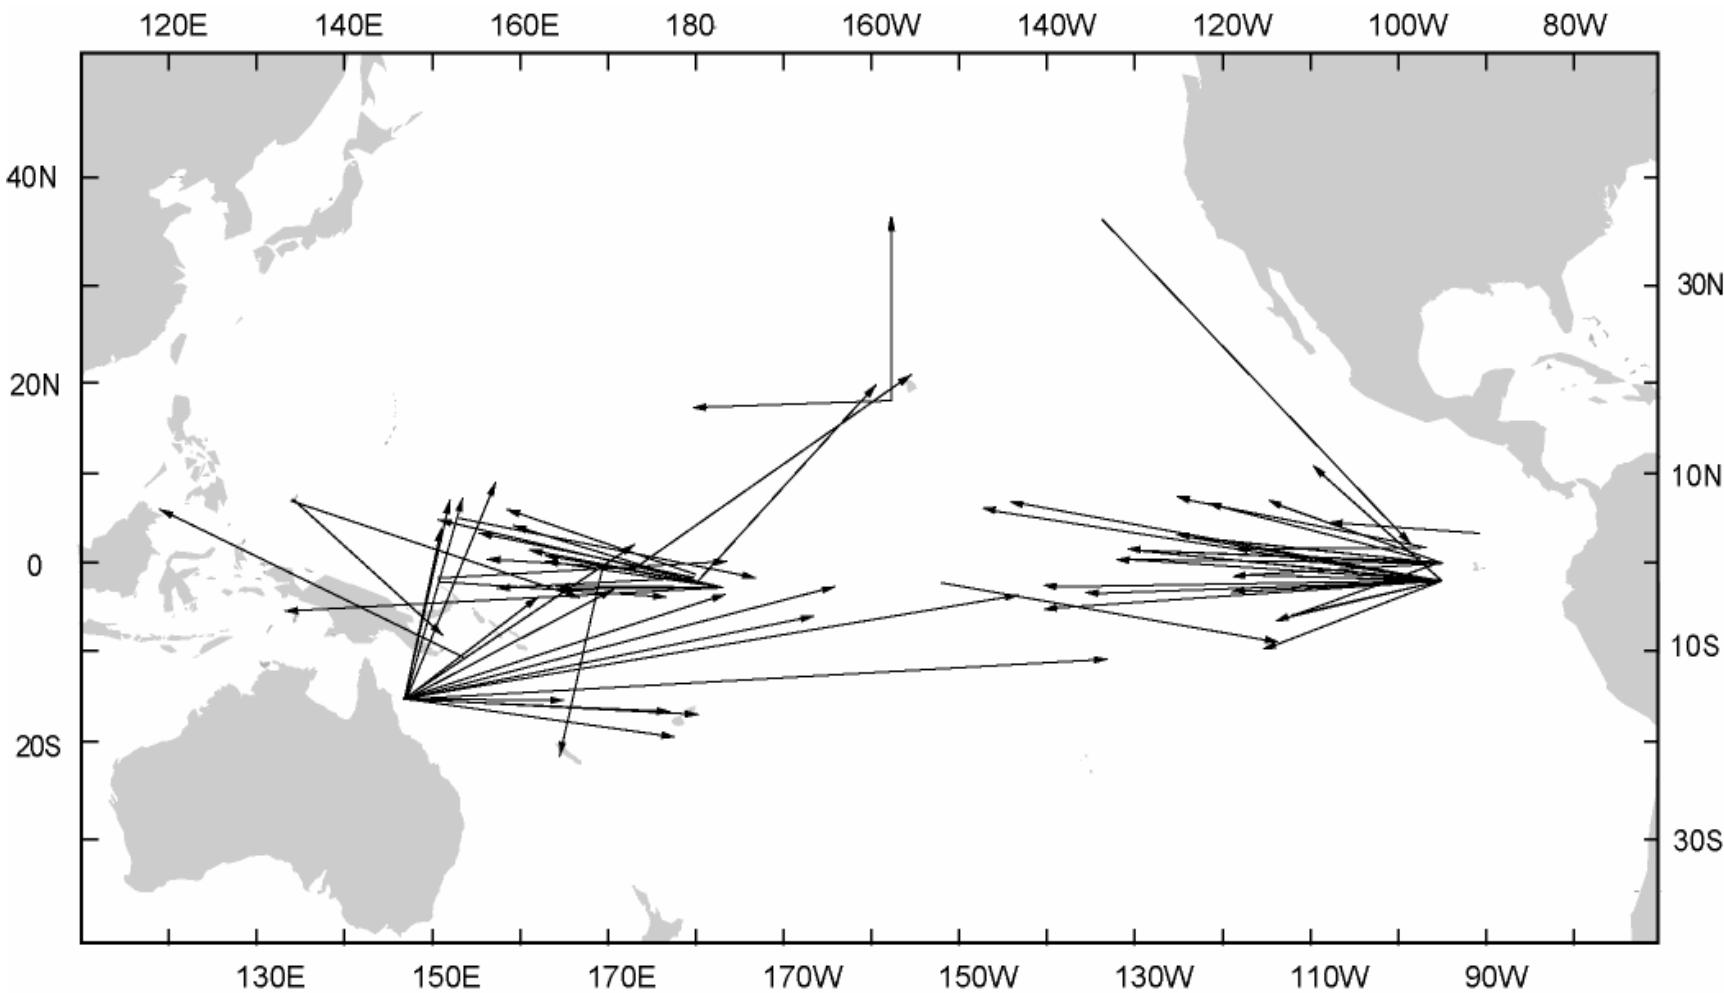

Capturas de patudo 1990-2000

Bigeye catches 1990-2000

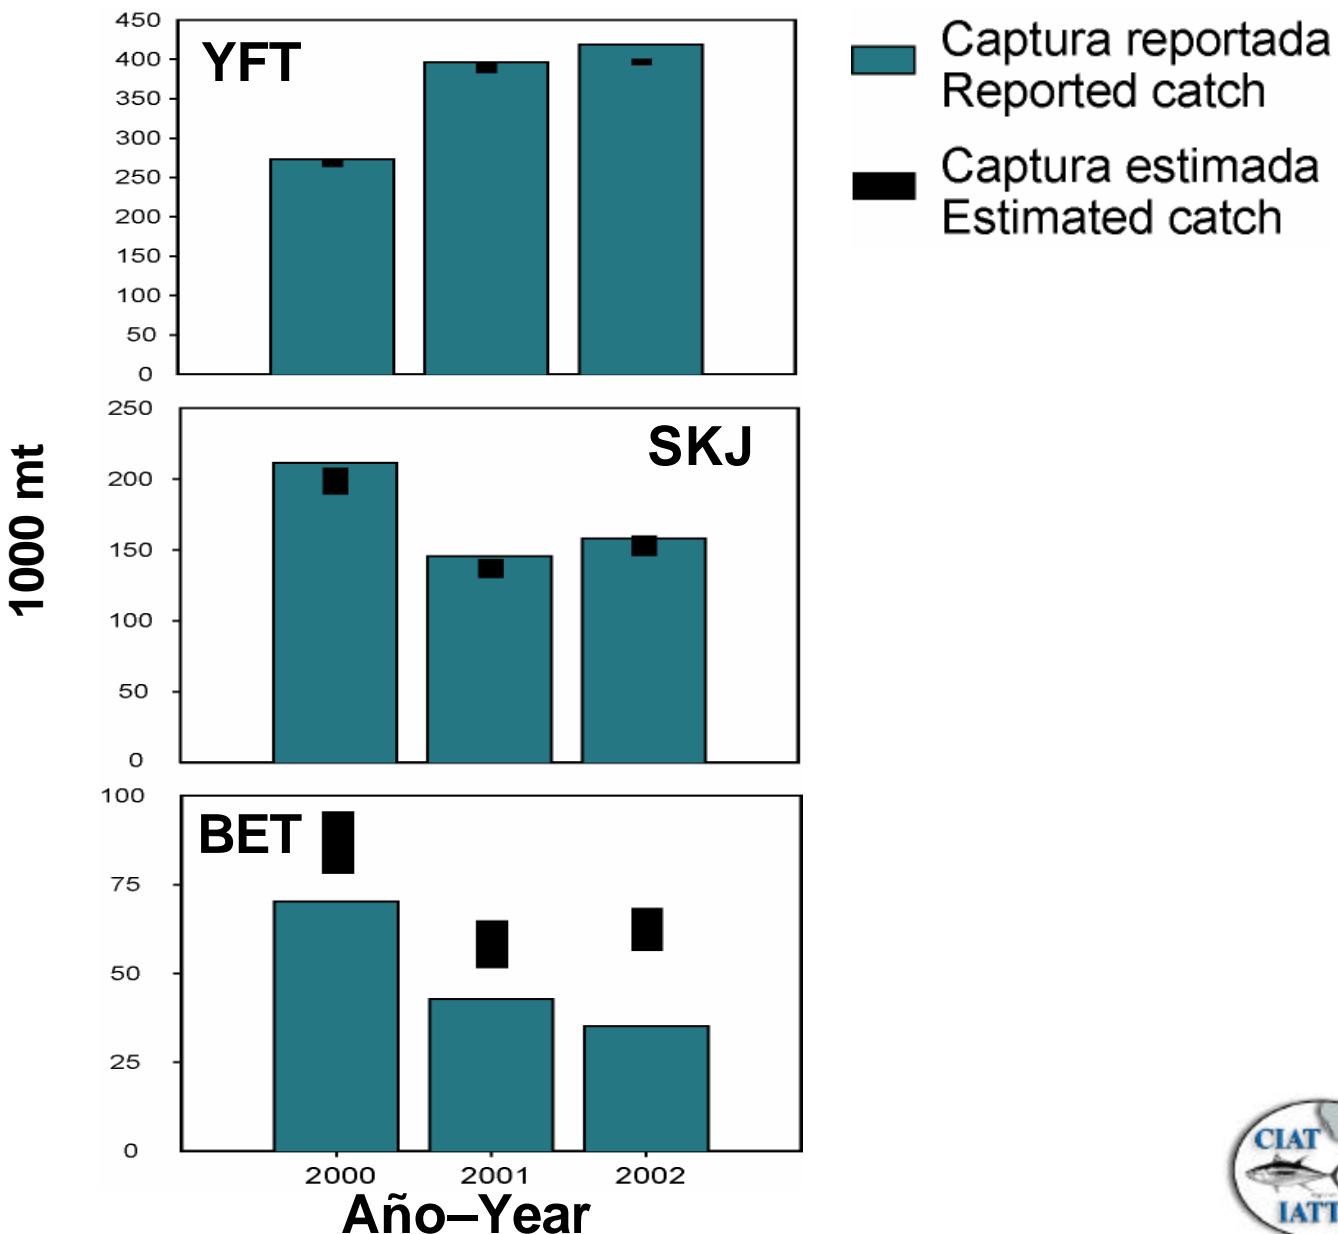

Desplazamiento de patudo más allá de las 1000 mn Bigeye tuna movements in excess of 1000 nm

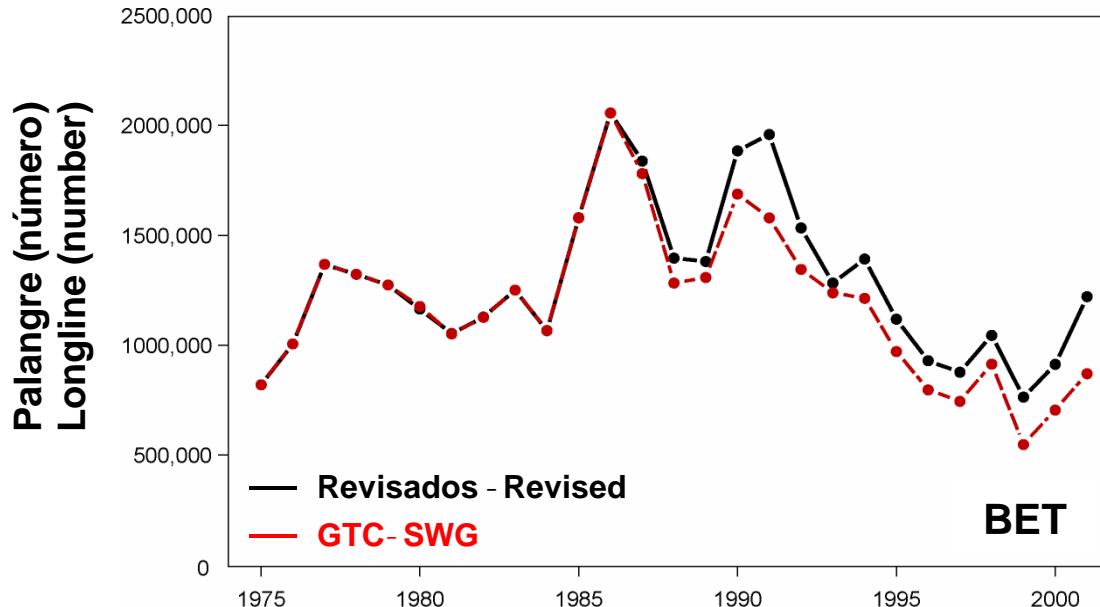

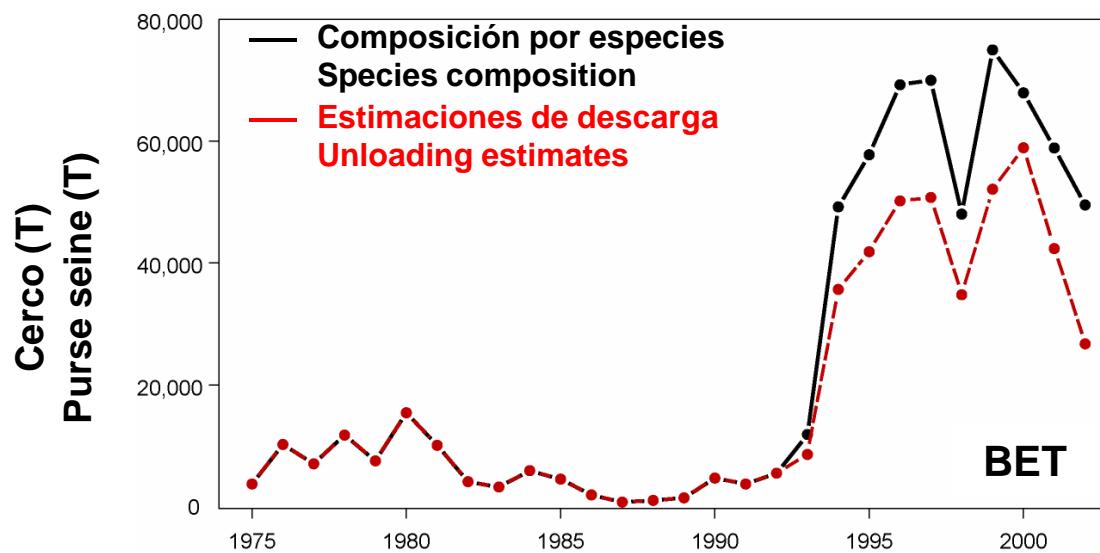

Capturas reportada y estimadas en 2000-2002

Reported and estimated catches in 2000-2002

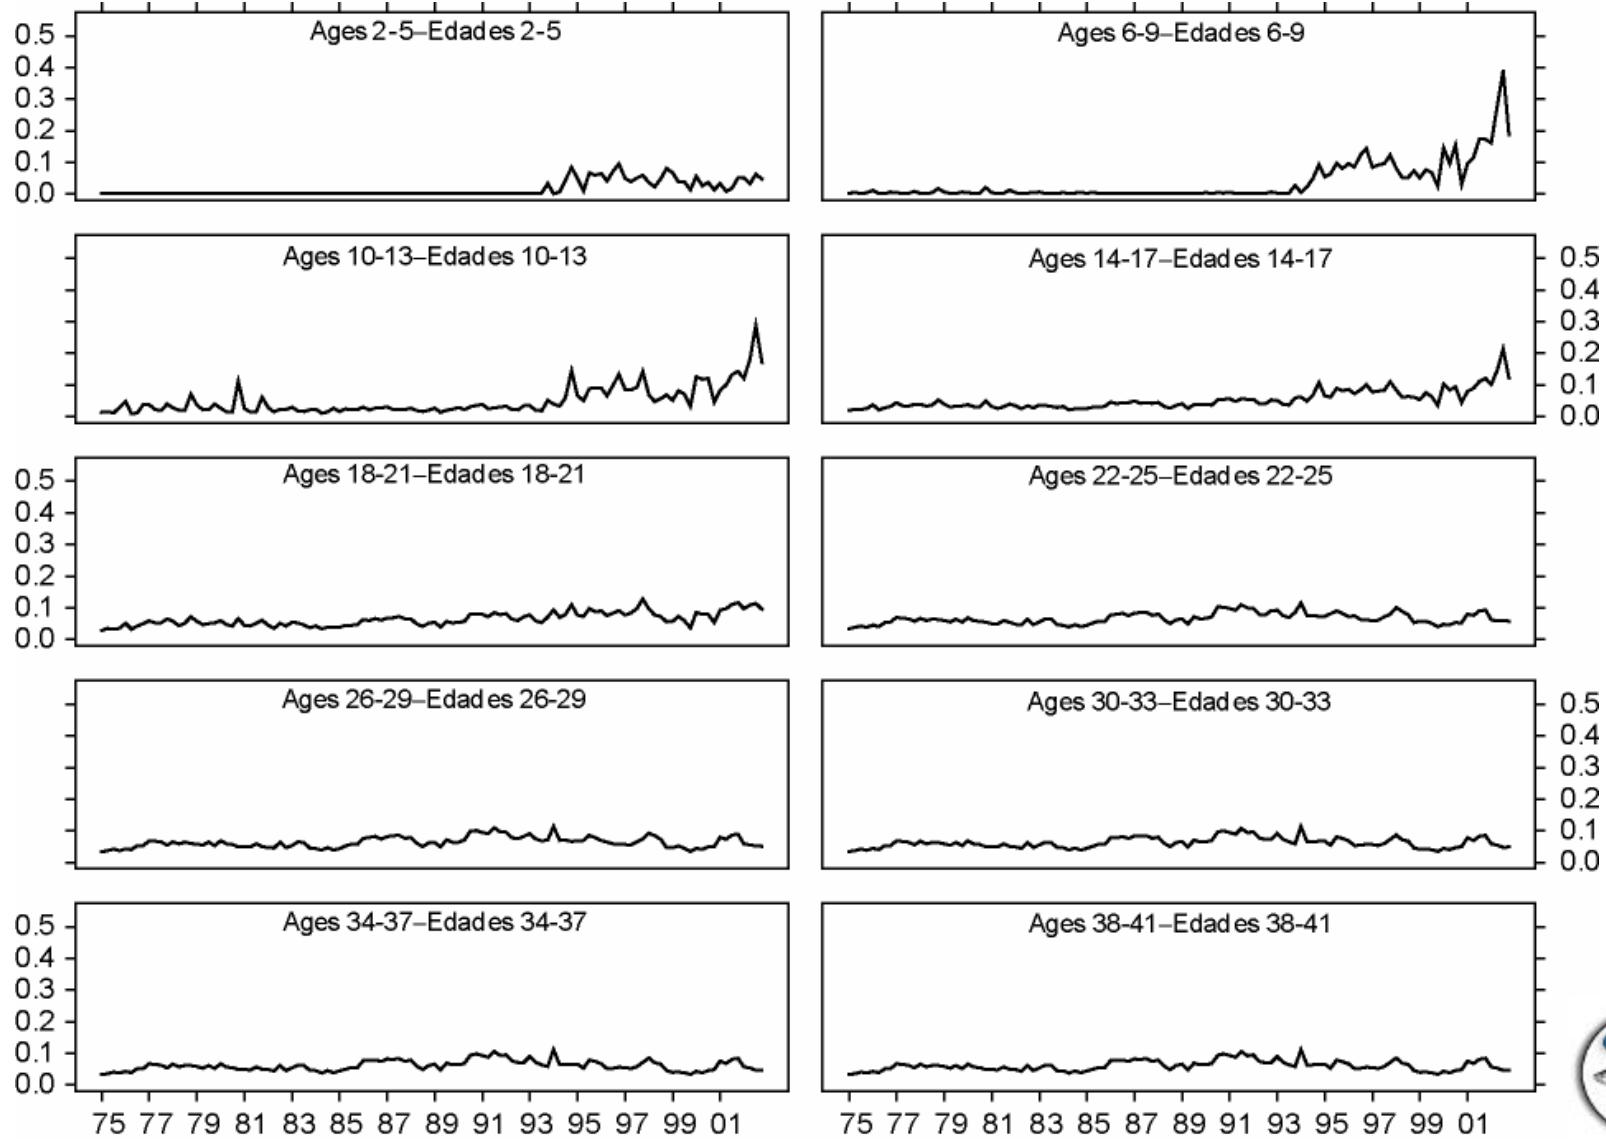

Captura estimada de patudo

Estimated catch of bigeye

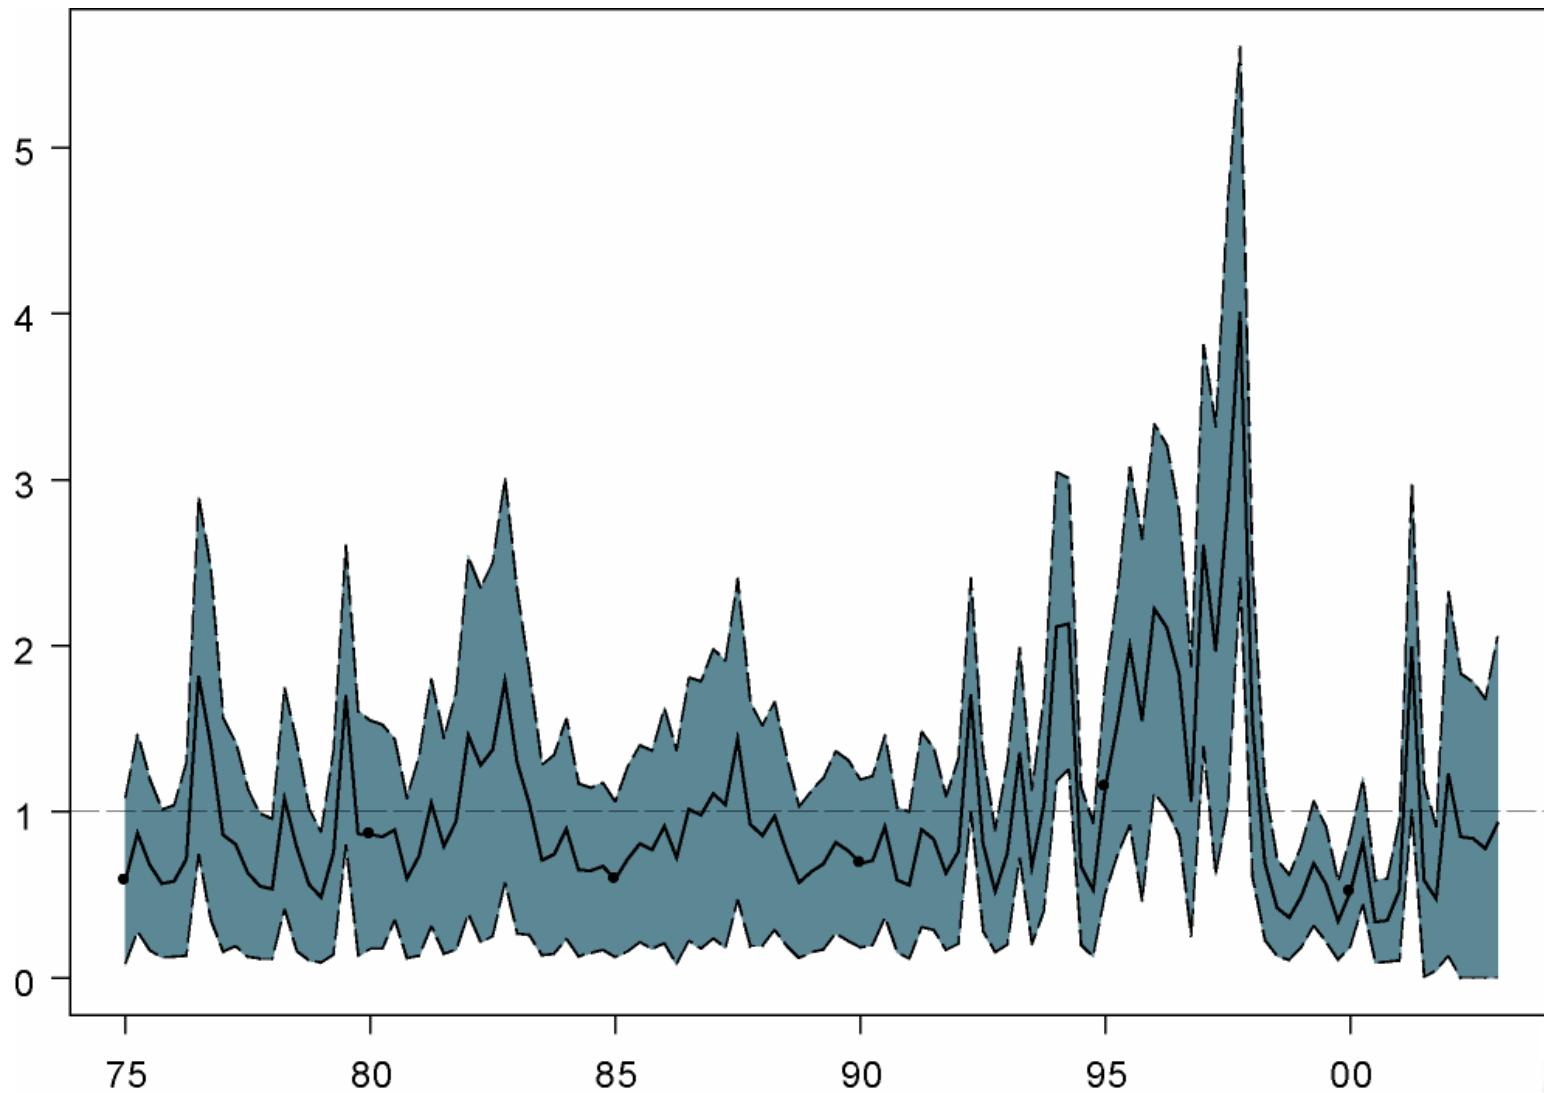

Atún patudo- Bigeye tuna

Promedio de F_{total} - Average total F

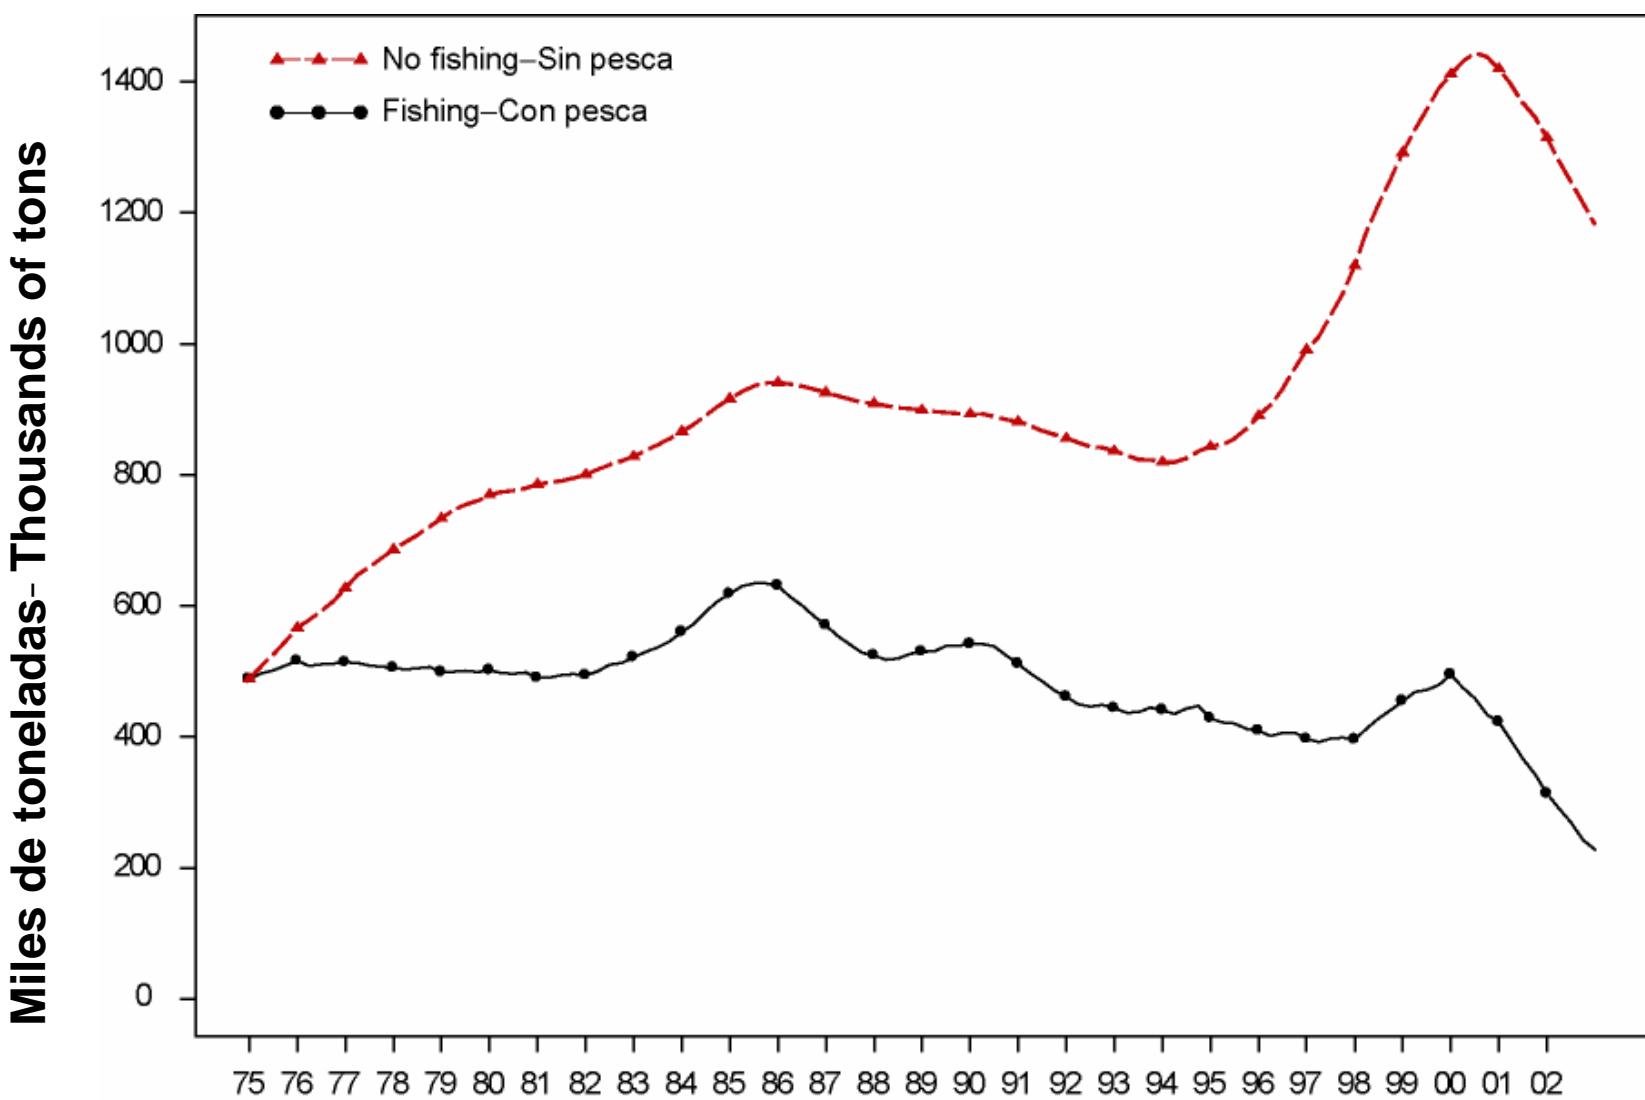

Atún patudo- Bigeye tuna

Reclutamiento relativo- Relative recruitment

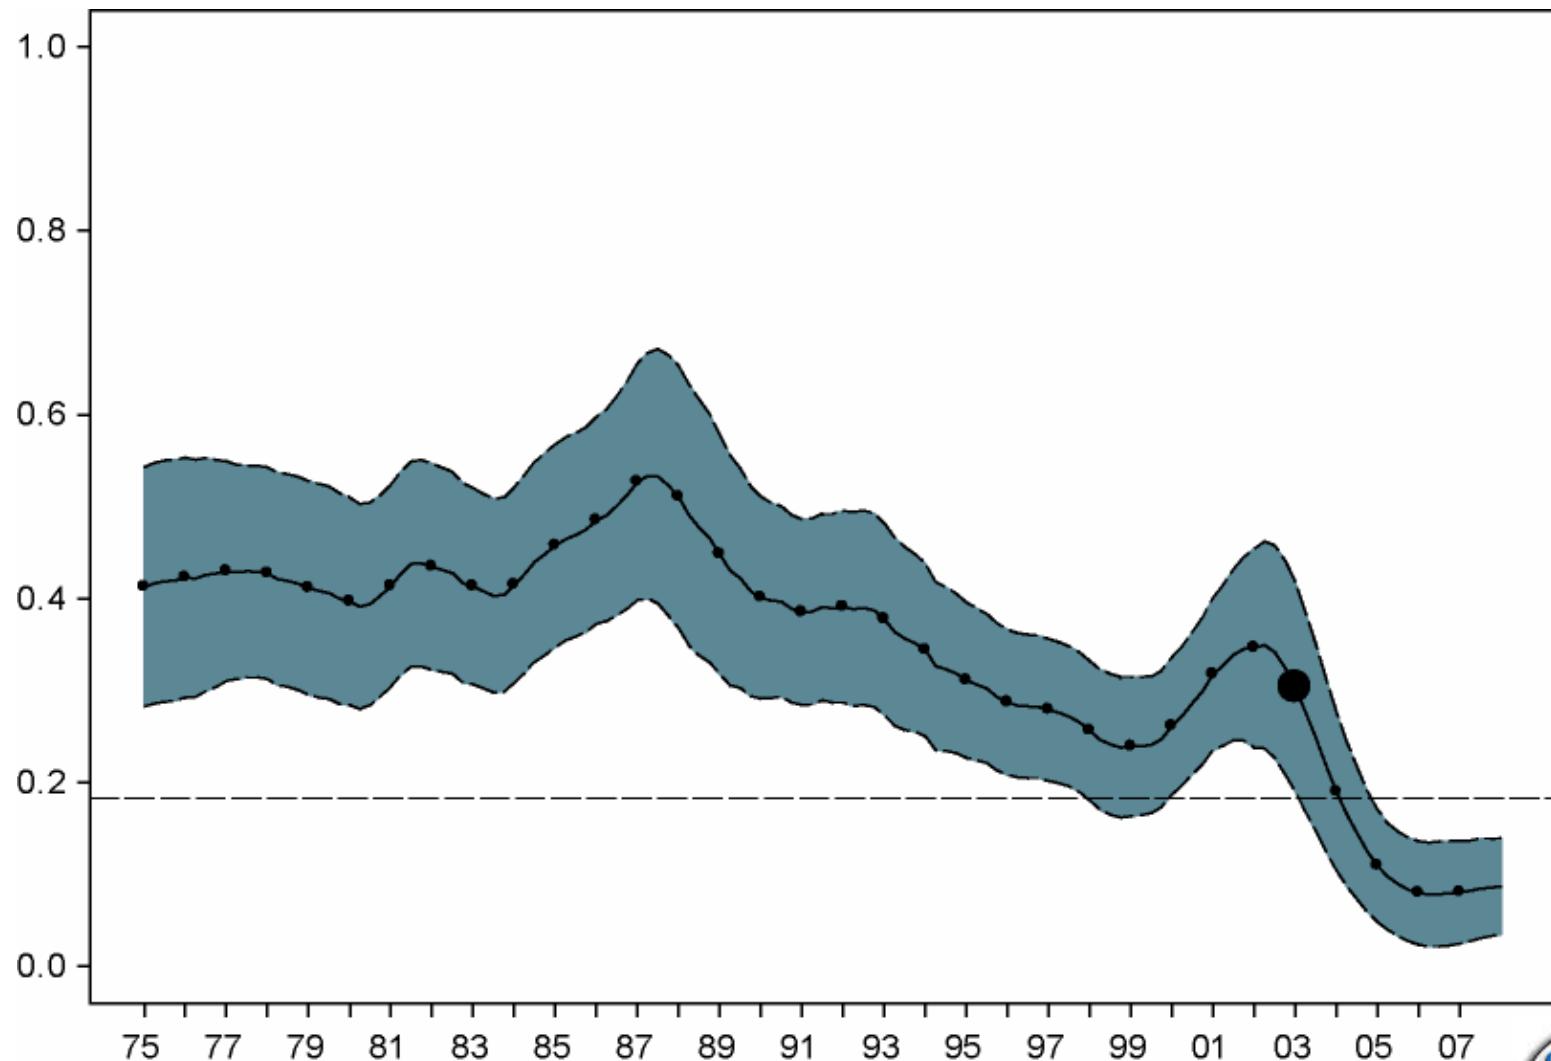

Atún patudo- Bigeye tuna

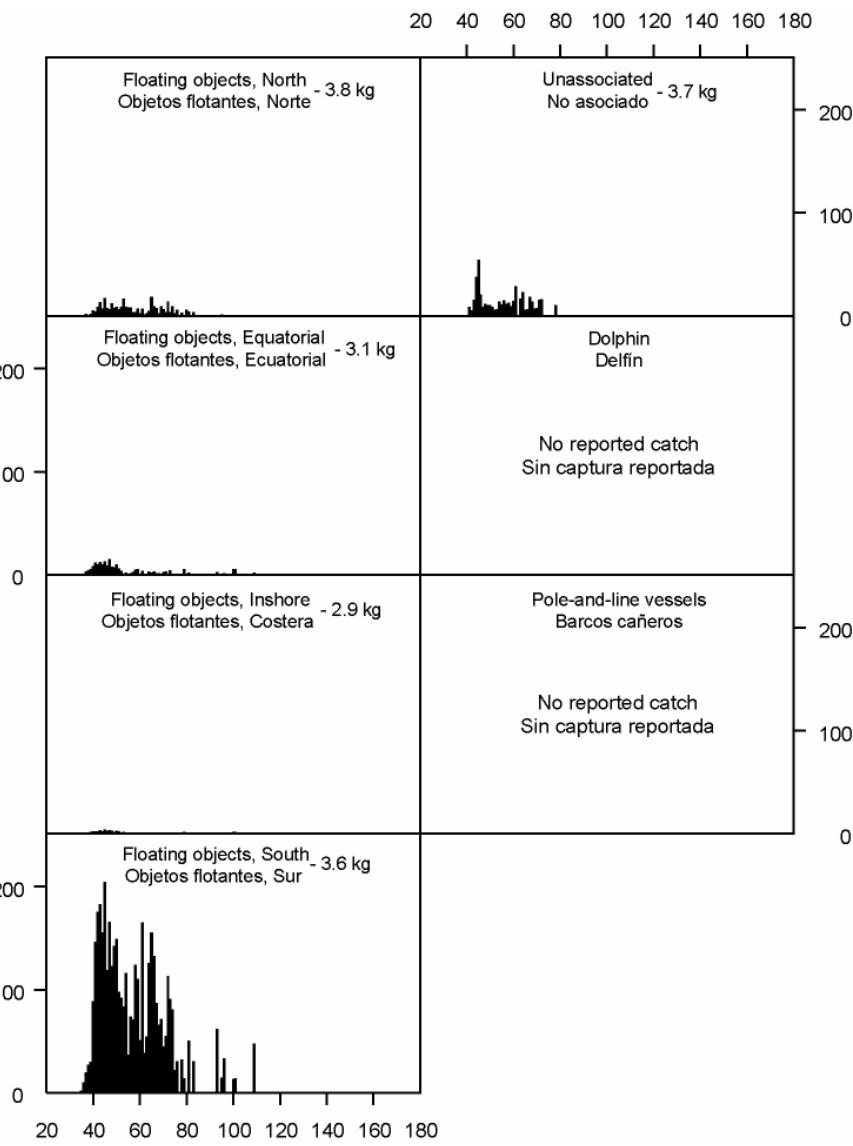

Atún patudo- Bigeye tuna

Cociente de biomasa reproductora
Spawning biomass ratio

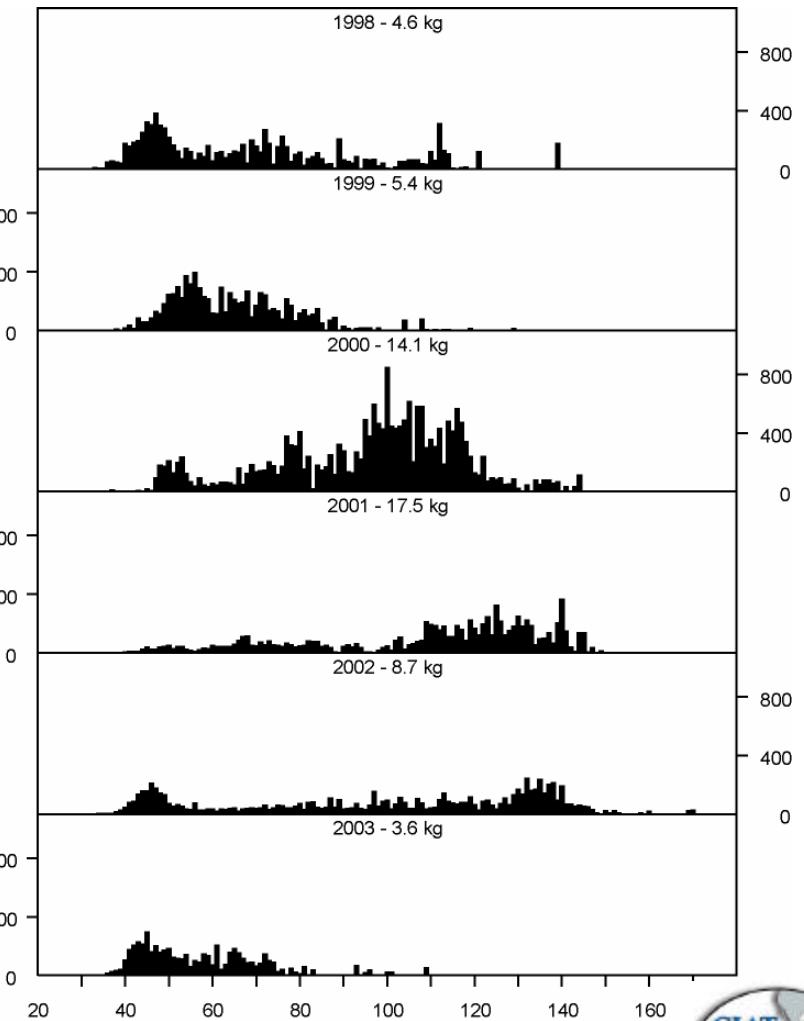

Atún patudo- Bigeye tuna

Metric tons- Toneladas métricas

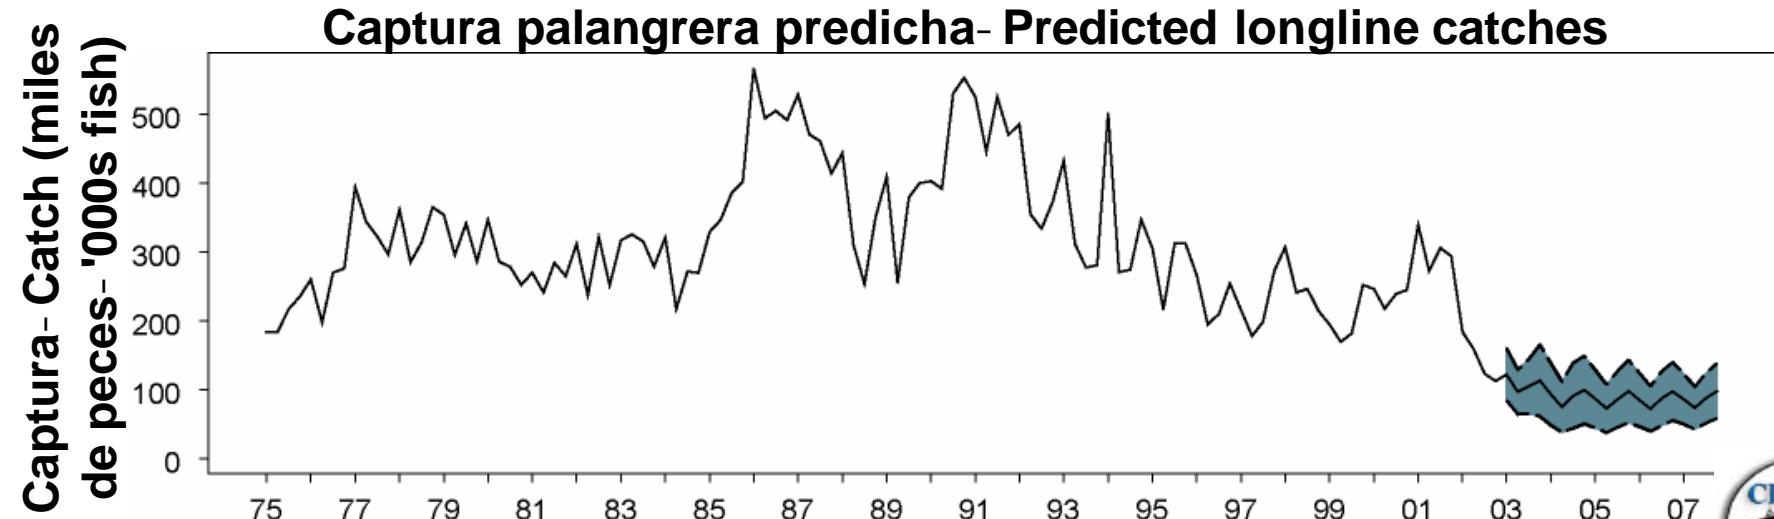

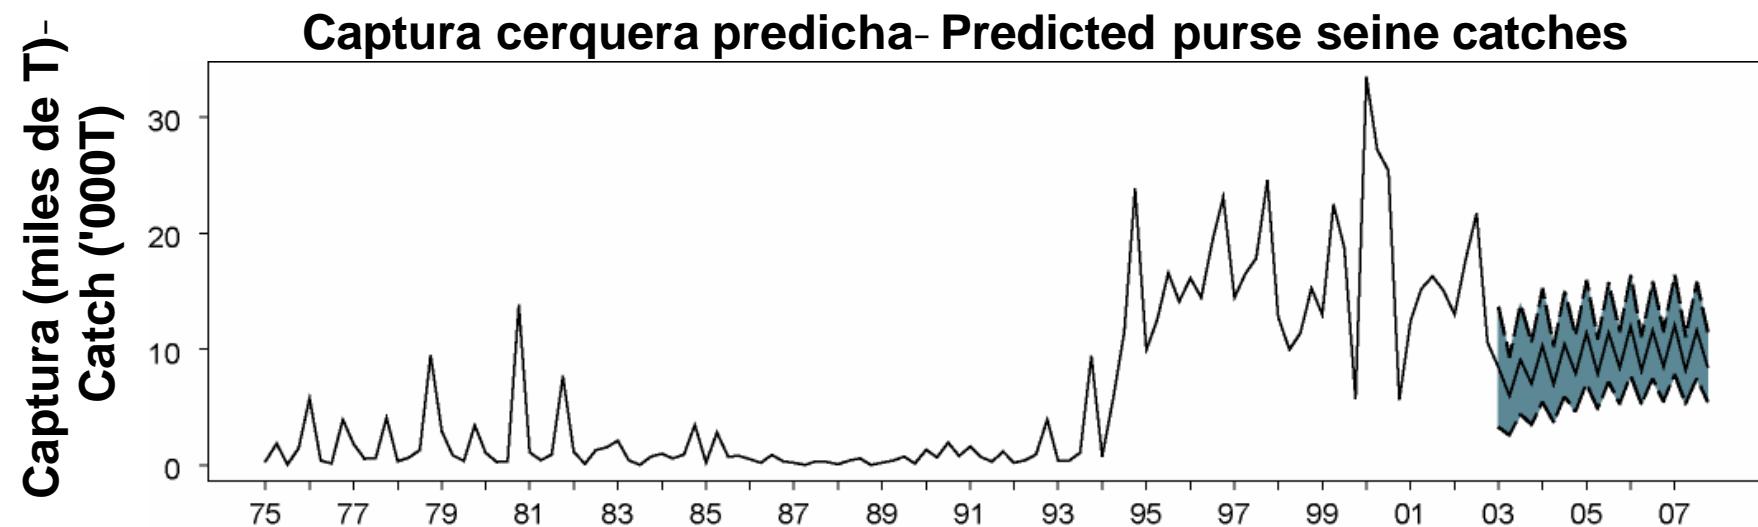

Talla (cm) Length

1st 3 months of each year

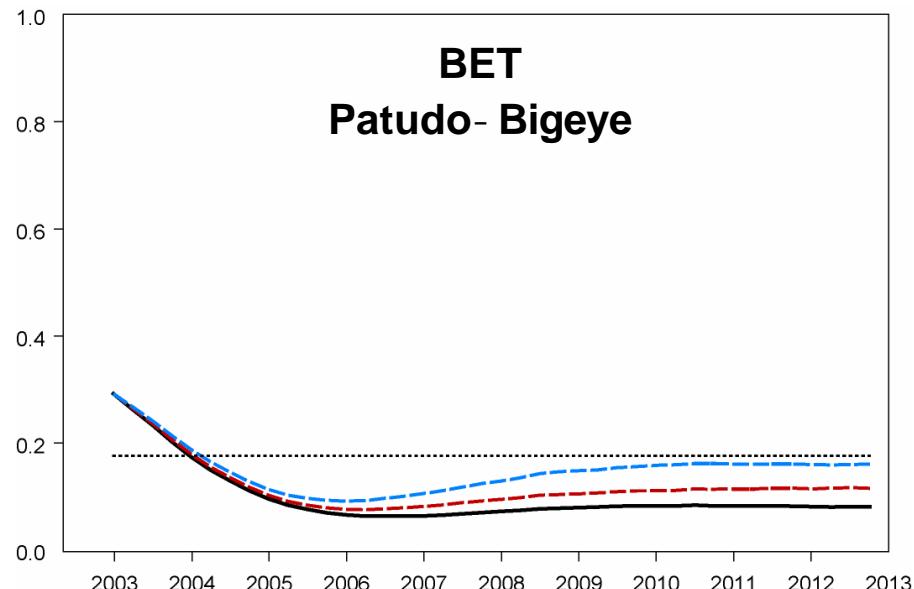

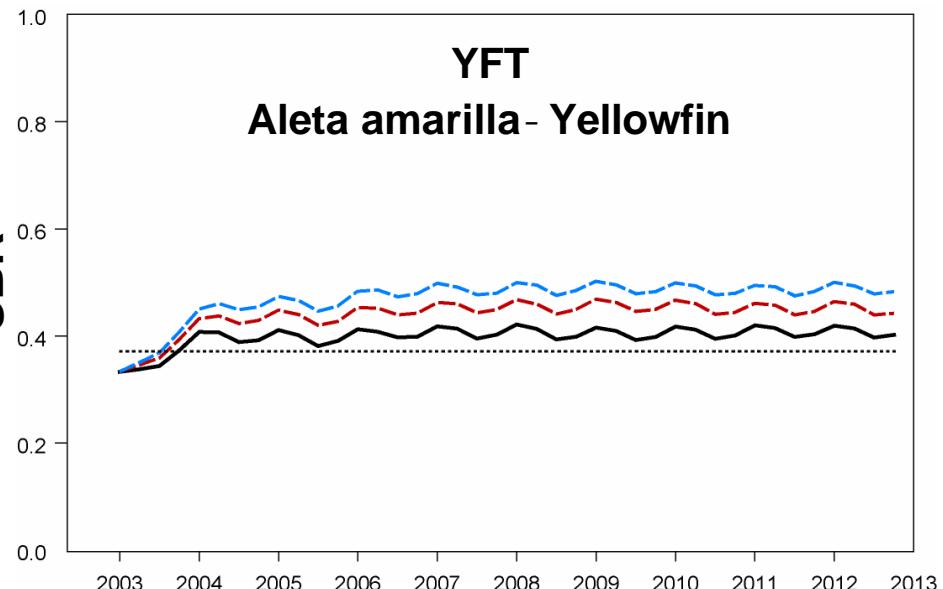

Atún patudo- Bigeye tuna

Simulación de los efectos de medidas de ordenación

Artículo publicado en *Nature* – *Nature article* (Myers & Worm)

- Expertos en la evaluación de poblaciones de atunes de agencias internacionales consideran el estudio inexacto
- Se ignoraron los comentarios de expertos
- No presenta datos de captura (disminuciones no consistentes con la dinámica de capturas y poblaciones)
- No presenta datos de especies individuales (resultados diferentes para especies individuales)
- Datos del Pacífico solamente para el sur de 10°S
- Información del Pacífico determinado principalmente por atún aleta azul del sur y atún albacora
 - aleta azul del sur ha sido sobreexplotado
 - cambios en especies objetivo redujeron capturas de albacora
- Resultados no reflejan la condición de atunes aleta amarilla, patudo o barrilete en el OPO

- Tuna stock assessment experts from international agencies consider the study flawed
- Experts comments were ignored
- Catch data not presented (the declines are not consistent with catch and population dynamics)
- Data for individual species not presented (results differ for individual species)
- Data from Pacific only for south of 10S
- Pacific are mainly determined by southern bluefin tuna and albacore tuna
 - southern bluefin has been over exploited
 - changes in targeting reduced the catches of albacore
- Results do not reflect of the status of yellowfin, bigeye or skipjack tuna in the EPO.
