

INTER-AMERICAN TROPICAL TUNA COMMISSION

101st MEETING

Victoria, Canada

7-11 August 2023

PROPOSAL IATTC-101 F-1

SUBMITTED BY ECUADOR

PROPOSED AMENDMENT TO RESOLUTION C-19-08 ON
SCIENTIFIC OBSERVERS FOR LONGLINE VESSELS

EXPLANATORY MEMORANDUM

IATTC Resolution C-19-08 requires a 5% observer coverage of the fishing effort made by the fleet of longline fishing vessels greater than 20 meters length overall of every CPC.

Taking into account that the 2023 staff recommendation in Document SAC-14-16, item 7.5, “Longline vessels observer program”, states the following:

“(a) That the countries with longline fleets update, in the IATTC Regional Vessel Registry, the list of vessels over 20 meters that operate in the EPO, as well as report the number of trips made by the different vessels during the previous year in order to calculate the percentage of observer coverage on longliners and assess compliance with Resolution C-19-08; (b) That CPCs submit all operational longline observer data collected from 1 January 2013 to present, consistent with the minimum data standards contained in Annex B of C-19-08 or provide a clear and complete explanation as to why the missing datasets have not been submitted; (c) That the Commission examine once again the percentage for observer coverage on LL vessels;”

Taking into consideration the recommendations of the Working Group on Bycatch to the Scientific Advisory Committee (SAC) at its 9th meeting in May 2019, particularly item 1: “*Revise Resolution C-11-08 to increase longline observer coverage on vessels >20 m LOA to 20% and consider ways to supplement observer requirements with electronic monitoring.*”

Furthermore, the recommendations of the tenth meeting of the SAC, Document IATTC-94-02, Section 3. “Data”, item 3.1.a. “Electronic Monitoring”, recommends the following:

*“The SAC recommends that the Electronic Monitoring (EM) initiatives implemented on purse seiners, both Classes 1-5 and Class 6, which will improve data collection for the purse-seine fleet, **are also tested in the longline fleet.**”*

Noting that large purse-seine vessels that fish in the Convention Area are required to carry 100% scientific observers aboard, in accordance with the Agreement on the International Dolphin Conservation Program. In addition, some CPCs’ shipowners of purse-seine vessels smaller than Class 6 make economic efforts to provide information on their activities and carry observers aboard in support of scientific research.

In this context, it is considered essential that the current resolution be modified to accommodate a complete observer coverage, whether by humans or by electronic means, which is an important action to measure effort in fishing days of the longline tuna fishery.

RESOLUTION C-23-XX

AMENDMENT TO RESOLUTION C-19-08 ON OBSERVERS FOR LONGLINE VESSELS

The Inter-American Tropical Tuna Commission (IATTC), gathered in ~~Bilbao, Spain~~ Victoria, British Columbia (Canada), on the occasion of its ~~94th~~ 101st Meeting;

Recognizing the need to collect better scientific information on target species as well as comprehensive data on interactions with non-target species, in particular, sea turtles, sharks and seabirds;

Noting the considerations of Parties with extensive longline fisheries and the need to ensure and promote uniform and equitable treatment of all tuna-fishing vessels operating in the Antigua Convention Area;

Noting that ~~all~~ large purse-seine vessels operating in the Convention Area are required to carry 100% scientific observers aboard, in accordance with the Agreement on the International Dolphin Conservation Program, ~~and that the Commission has recommended the extension of observer coverage to smaller purse-seine vessels on a voluntary basis;~~

~~Taking into account that IATTC scientific staff and the IATTC Working Group on Bycatch have reiteratedly recommended at least 20% observer coverage on longline vessels fishing for tunas in the Convention Area, and that the Working Group on Bycatch suggested that human observer coverage could be supplemented by electronic monitoring systems (EMS) in order to achieve that goal; and~~

~~Noting that the Scientific Advisory Committee (SAC), at its 10th meeting in May 2019, determined that the appropriate measure of longline fishing effort for calculating observer coverage is “number of hooks.”~~

Acknowledging that some CPCs’ shipowners of purse-seine vessels smaller than Class 6 make economic efforts to provide information on their activities, carrying observers aboard, in support of scientific research; and

Taking into account all recommendations of the staff, the SAC, for 2023 in Document SAC-14-16, and the Working Group on Bycatch at their meetings in 2019 and the considerations of the CPCs;

Agrees that:

1. Each Member and Cooperating non-Member (CPC) shall ensure that active longline vessels greater than 20 meters length overall carry human observers or electronic monitoring systems, in accordance with the following timeline:

<u>1 January 2024</u>	<u>10%</u>
<u>1 January 2025</u>	<u>20%</u>
<u>1 January 2026</u>	<u>50%</u>
<u>1 January 2027</u>	<u>100%</u>

~~1.2. For the purposes of this Resolution, longline fishing effort is defined as~~ shall be determined by the number of effective days of fishing⁺ ~~or hooks deployed.~~

3. The main task of the scientific observers and/or EMS the remote electronic monitoring systems shall be to record, consistent with data standards established by the SAC, any available biological information, the catches of targeted fish species, species composition, and any available biological information, as well as any interactions with non-target species such as sea turtles, seabirds and sharks; and, when appropriate, to apply the mitigation measures agreed by the Commission in a timely and

⁺ ~~As defined by SAC-03 in 2012~~

accurate manner.

4. When communicating the results of the remote electronic monitoring program, the margin of error inherent to the technical specifications of the system, which shall not exceed a range of +/- 5%, shall also be reported.
 5. With this information, the State/CPC authorities shall provide a report on the catching vessel, including the following documents: a) technical report on the remote monitoring system used; b) general information on date, location (longitude and latitude), species, statistics on length distribution, average size and weight.
 6. The aforementioned video recordings shall also be available for analysis by the IATTC, and each CPC shall establish the necessary measures to prevent any replacement, editing or manipulation.
 7. Each CPC shall update the list of its vessels by specifically indicating which vessels are active and the percentage of observers aboard and/or remote monitoring systems, in addition to inactive and/or sunk vessels.
 8. The Director, in cooperation with the scientific staff and the Scientific Advisory Committee, shall review the reporting format detailing the required data to be collected directly by scientific observers or by electronic methods of remote monitoring and video cameras on longline vessels, and shall communicate it to the Commission.
 9. Scientific observers shall submit to their flag CPC authorities a report on these observations at the latest 30 days after the end of each fishing trip.
 10. Every year, CPCs shall submit to the Scientific Advisory Committee, through the Director, by 31 March, the scientific observers' information on the previous year's fishery in a format established by the Committee.
 11. Provisionally adopt the definitions contained in Annex 1 of Document EMS-01-01 prepared by the IATTC scientific staff for longline vessels.
 12. That the Electronic Monitoring System (EMS) work plan detailed in Document EMS-01-02 for longline vessels, proposed by the IATTC Secretariat, be implemented provisionally, and that a working group be created to follow up and make any necessary modifications.
 13. That the IATTC scientific staff, in consultation with CPCs and stakeholders, within 90 days of the adoption of this resolution, develop Terms of Reference for the implementation of workshops on electronic monitoring for longline vessels.
- ~~2. Each Member and Cooperating Non-Member (CPC) shall ensure that at least 5% of the fishing effort made by its longline fishing vessels greater than 20 meters length overall carries a scientific observer.~~
 - ~~3. Each CPC shall endeavor to ensure that observer coverage is representative of the activities of its fleet, including in terms of gear configuration, target species and fishing areas.~~
 - ~~4. CPCs shall:~~
 - ~~a. Ensure that the minimum level of coverage is met;~~
 - ~~b. Take all necessary measures to ensure that observers are able to carry out their duties in a competent and safe manner;~~
 - ~~c. Endeavor to ensure that observers alternate vessels between their assignments;~~
 - ~~d. Ensure that the vessel on which an observer is placed provide suitable food and lodging during the observer's deployment at the same level as the officers, where possible. Vessel masters shall ensure that all necessary cooperation is extended to observers in order for them to carry out their duties safely, including providing access, as required, to the retained catch, and catch which is intended to be discarded.~~

~~5. The reporting requirements established by the SAC pursuant to resolution C-11-08 can be found in Annex A. The SAC may decide to modify these reporting requirements or establish new ones whenever deemed necessary and shall notify the Commission as appropriate for endorsement at the subsequent annual meeting of the IATTC.~~

~~6. CPCs shall submit operational data collected by observers from the previous year, consistent with the Minimum Data Reporting Standards (Annex B), to the Director no later than June 30 of each year.~~

~~7. Unless otherwise specified by the SAC, CPCs shall submit other reporting under this Resolution by 31 March of each year.~~

~~9. The IATTC Scientific Staff, in consultation with CPCs, shall prepare a draft proposal for the development of minimum standards for the implementation of an EMS for the longline fleets, taking into account the experience of CPCs that are implementing EMS on longline vessels and progress made in other tuna RFMOs, to be submitted to the SAC meeting of 2020.~~

~~10. The SAC, in consultation with the IATTC Scientific Staff, shall present recommendations on this proposal to the Commission for its consideration at its annual meeting in 2020.~~
