

Comisión Interamericana del Atún Tropical
Inter-American Tropical Tuna Commission

SWORDFISH 2010

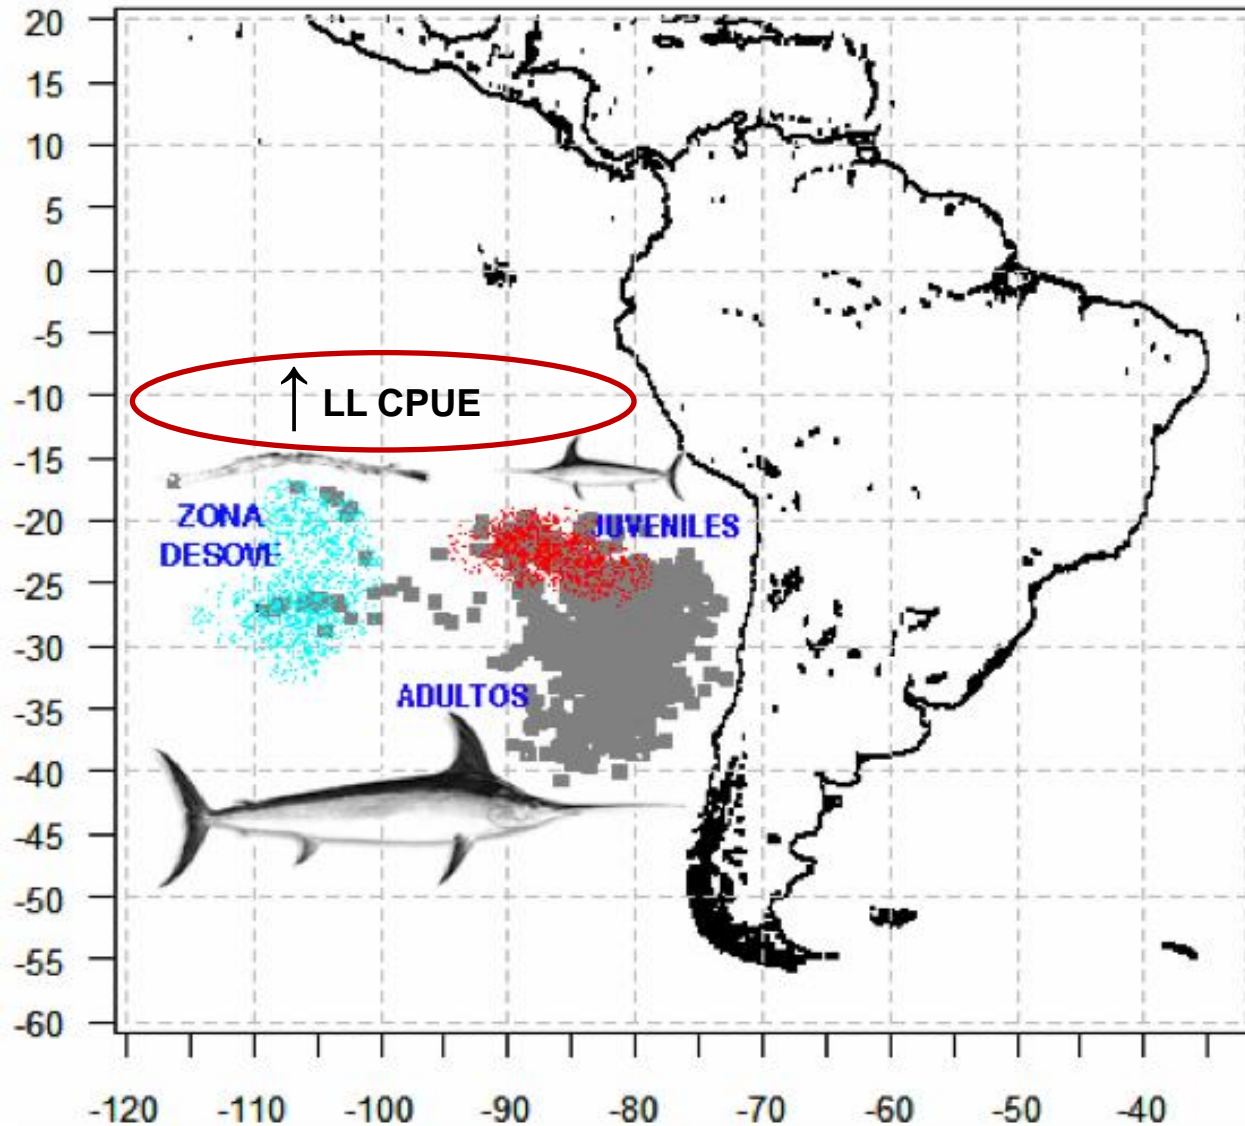

Key Conclusions

- 1. Not experiencing overfishing & not overfished**
- 2. SBR ~ 1.45**
- 3. Recent catch ~ 14,300; MSY ~ 25,000**
- 4. Recent high recruitments (2007 – 2010)**
- 5. Projections**
 - a. Assume: Current Eff & Ave Recruits**
 - b. Results:**
 - a. Decreasing catch rates**
 - b. Decreasing catch**

Post-1999

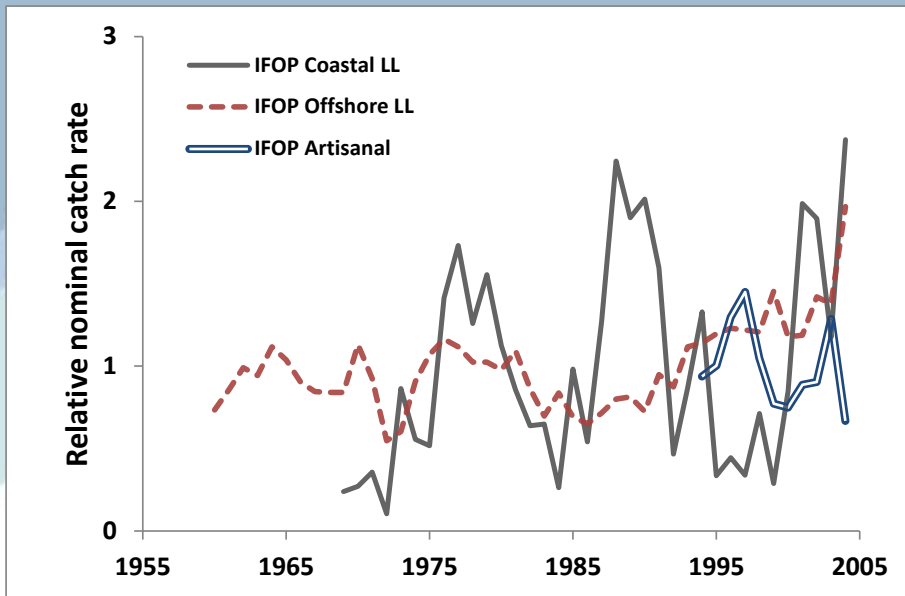

SS 3.20b Model Structure

Time Period	1945 – 2010
Two genders	No hermaphrodites
Seasonal	Spawning Qtr 1 & 2
One area	Offshore + Coastal Fisheries
Natural mortality (M)	0.4
S-R	BH, $h = 1.0$
Growth	von B w/fixed K & L_{inf} by gender
Length at Age 1	Fixed by Gender
CV of Length at Age	Fixed = 1.0
Max Age (accumulator)	15 years
Indices of Abundance	F3 & F4 (CVs fixed = 0.2)
Selectivities	F3, F4, F5 & F6 dome shaped F1 & F2 asymptotic F6 time blocks < 2000 & > 1999
Non-seasonal data	Assigned to Qtr 2
