

ANNUAL REPORT ON TRANSSHIPMENT

September, 2021

JAPAN

Transshipment operations by Japanese large-scale tuna longline vessels (LSTLVs) are being carried out based on Resolution C-12-07. The masters/owners of the LSTLVs shall notify transshipment information (including the name of receiving vessel, date, location and amount of fish to be transshipped) to the Fisheries Agency for prior authorization, and transmit the IATTC Transshipment Declaration after the transshipment.

In 2020, 12 Japanese LSTLVs carried out transshipment operations, and 1,527.8 tons of tunas, tuna-like species and others were transshipped to carrier vessels authorized to receive transshipments in the IATTC area. The quantities by species transshipped during 2020 are shown in Table 1. The list of the IATTC LSTLVs which have transshipped during 2020 are shown Table 2.

ANNUAL REPORT ON AT-SEA TRANSSHIPMENT

August, 2020

JAPAN

Transshipment operations by Japanese large-scale tuna longline vessels (LSTLVs) are being carried out based on Resolution C-12-07. The masters/owners of the LSTLVs shall notify transshipment information (including the name of receiving vessel, date, location and amount of fish to be transshipped) to the Fisheries Agency for prior authorization, and transmit the IATTC Transshipment Declaration after the transshipment.

In 2019, 8 Japanese LSTLVs carried out at-sea transshipment operations, and 828.1 tons of tunas, tuna-like species and others were transshipped to carrier vessels authorized to receive transshipments in the IATTC area. The quantities by species transshipped during 2019 are shown in Table 1. The list of the IATTC LSTLVs which have transshipped during 2019 are shown Table 2. All the transshipment operations were monitored by observers placed on board in accordance with the IATTC Regional Observer Program.
