Rights-Based Management for HMS Fisheries

MCS

- Key facet of each of the models
- Need to “trust-- but verify”
- Large set of options available
- All come at “cost” – some much more than others
- Establishment of the appropriate incentives – move away from “command and control”-based systems
- Propensity toward cost minimization as one moves toward ITQ based system

Rights-Based Management for HMS Fisheries

MCS

- Issue of actual enforcement –some activities will continue to reside w/ the member / state.
- Always be the need for some “external” monitoring, auditing at the Corp level.
- Kobe process reviews at the RFMO level.

MCS Element:	TUNACORP	COUNTRY ALLOCATIONS	UNIVERSAL ITQS	STATUS QUO IATTC (no AIDCP)
Regional Registers				
At-Sea Reporting				
VMS				
Shore-side Mon				
Observers				
Boarding and Inspection				
Catch/Trade Documentation				
Trade Measures				
Internal (social) controls				
Port State Measures				
Others
