

**INTER-AMERICAN TROPICAL TUNA COMMISSION**  
**PERMANENT WORKING GROUP ON FLEET CAPACITY**

**MINUTES OF THE 5<sup>TH</sup> MEETING**

**La Jolla, California (USA)**  
**October 25-26, 2000**

**AGENDA**

1. Opening of the meeting
2. Adoption of the agenda
3. Review of the last draft resolution on the capacity of the tuna fleet operating in the eastern Pacific Ocean discussed at the 4<sup>th</sup> meeting of the Working Group
4. Consideration of future capacity limitations
5. Other business
6. Place and date of next meeting
7. Adjournment

**APPENDICES**

1. List of attendees
2. Proposal on the capacity of the tuna fleet operating in the eastern Pacific Ocean
3. Tuna purse-seine vessels operating in the eastern Pacific Ocean, October 26, 2000

The 5<sup>th</sup> Meeting of the Permanent Working Group on Fleet Capacity was held in La Jolla, California (USA), on October 25-26, 2000. The Chairman was Ing. Arnulfo Franco, of Panama, and the meeting was attended by representatives of the governments of Colombia, Costa Rica, Ecuador, El Salvador, European Community, France, Guatemala, Japan, Mexico, Nicaragua, Panama, Peru, Spain, United States of America, Vanuatu and Venezuela, and of the Humane Society of the United States, Whale and Dolphin Conservation Society, and World Wildlife Fund. The attendees are listed in Appendix 1.

## **2. Adoption of the agenda**

The provisional agenda was approved without modifications.

## **3. Review of the last draft resolution on the capacity of the tuna fleet operating in the eastern Pacific Ocean discussed at the 4th meeting of the Working Group**

The Chairman presented a brief summary of the results of the 4<sup>th</sup> meeting of the Working Group, and reviewed the draft resolution on the capacity of the tuna fleet operating in the EPO discussed but not agreed at that meeting (Appendix 2).

The Secretariat distributed a list of vessels operating in the EPO as of October 26, 2000 (Appendix 3).

## **4. Consideration of future capacity limitations**

The Chairman proposed that the discussion start on the basis of the draft resolution from the 4<sup>th</sup> meeting of the Working Group. The Working Group discussed this draft resolution extensively, but it was not possible to reach agreement on the amount of carrying capacity requested by the countries.

During a meeting of the heads of delegations, a proposal was made to establish an initial total fleet capacity of the capacity levels in the draft resolution plus 15.5%, or 203,000 mt, with the idea that a plan to gradually decrease the capacity would be agreed in the near future. However, agreement could not be reached on this proposal.

## **5. Other business**

No other business was discussed

## **6. Place and date of the next meeting**

It was tentatively agreed that the next meeting should take place in February in La Jolla, California.

## **7. Adjournment**

The meeting was adjourned October 26, 2000, at 10:00 p.m.

## Appendix 2.

### **DRAFT RESOLUTION ON THE CAPACITY OF THE TUNA FLEET OPERATING IN THE EASTERN PACIFIC OCEAN**

**02 AUGUST 2000**

*The Parties to the Inter-American Tropical Tuna Commission (IATTC):*

*Aware* that the issue of excess fishing capacity is of concern worldwide and is the subject of an International Plan of Action developed by the United Nations Food and Agriculture Organization;

*Understanding* that excess fishing capacity in a region makes it more difficult for governments to agree on and implement effective conservation and management measures for the fisheries of that region;

*Concerned* that fishing capacity in the eastern Pacific Ocean (EPO) has been increasing in recent years;

*Believing* that it is important to limit fishing capacity in the EPO in order to help ensure that the tuna fisheries in the region are conducted at a sustainable level;

*Aware* of the importance of tuna fishing to the economic development of the Parties, in particular the coastal states;

*Committed* to giving full effect to the relevant rules of international law, as reflected in the United Nations Law of the Sea Convention, including the rights and obligations of coastal states;

*Recalling* the resolution of the 62<sup>nd</sup> Meeting of the IATTC to limit the capacity of the tuna purse-seine fleet in the EPO during 1999;

*Considering* the conservation and management measures adopted by the IATTC, including measures related to fishing on fish-aggregating devices, and the prohibitions on the use of tender vessels and transshipments at sea; and

*Seeking to address* the problem of excess capacity in the tuna purse-seine fleet operating in the EPO by limiting such capacity to a level which, when viewed in relation to other agreed management measures and projected and actual levels of catch, will ensure that tuna fisheries in the region are conducted at a sustainable level:

*Have agreed as follows:*

1. For the purposes of this Resolution, the EPO is defined as the area bounded by the coastline of the American continent, the 40° North parallel, the 150° West meridian and the 40° South parallel.
2. To include in the Regional Vessel Register, contemplated in the resolution of the 66<sup>th</sup> Meeting of the Commission, the well volume in cubic meters and carrying capacity in metric tons that will serve as a basis for any decision on the capacity of the EPO fleet.
3. To limit, together with those states or regional economic integration organizations (REIOs) which have applied for membership of the Commission, the carrying capacity of their respective tuna purse-seine fleets operating in the EPO, in accordance with the following table:

	Carrying capacity (metric tons)
Colombia*	8,608
Costa Rica*	8,000
Ecuador	34,500
El Salvador	4,000
United States	8,969
Guatemala	5,050
Mexico	50,048
Nicaragua	4,000
Panama	5,600
European Union	9,595
Vanuatu	12,121
Venezuela	25,975
TOTAL	176,466

4. To recognize that Peru, which is not a High Contracting Party of the Commission but which is cooperating with the conservation and management measures of the Commission, has agreed to limit the carrying capacity of its tuna purse-seine fleet to 3,500 metric tons of carrying capacity\*.
5. To not include in the Regional Vessel Register vessels flying the flags of states or REIOs that have not applied for membership of the Commission or that do not cooperate with the management and conservation measures adopted by the Commission.
6. To prohibit the entry of new vessels to the EPO purse-seine fleet except in the following cases: 1) to allow [El Salvador and Nicaragua to utilize] [the utilization of] the capacity assigned [to them] pursuant to this resolution; and 2) to replace vessels removed from the fleet, provided that any replacement does not result in the total capacity of any country's fleet exceeding the limit established for that country pursuant to this resolution.
7. [Vessels entering the fishery for the first time pursuant to paragraph 6 shall not exceed 1,500 metric tons or 2,100 cubic meters of well capacity. A one-time exception to this prohibition shall be allowed in the case of El Salvador.]
8. Notwithstanding the capacity limits set forth above, the Parties and states or REIOs that have applied for membership of the Commission acknowledge that the current level of fishing capacity is in excess of the optimal level required to efficiently harvest the tuna resources in the EPO. In this regard, they agree to develop and implement a plan to achieve a target level of 135,000 metric tons of carrying capacity, or such other limit as the Commission may decide, by January 1, 2005, as set forth in the following paragraph.
9. The Parties request that the IATTC staff, in cooperation with the Parties, prepare a comprehensive draft plan for regional management of fishing capacity in accordance with the FAO International Plan of Action for the Management of Fishing Capacity. The plan, once adopted, will serve as the basis for further action by the Commission with respect to the distribution and allocation of capacity within the EPO tuna fleet and, in particular, for achieving the reduction in overall fleet capacity set forth in paragraph 8 above.
10. This plan shall include an assessment of the impact of vessels of less than 250 metric tons carrying capacity on the fishery resources of the EPO with a view to considering how these vessels should be treated under the capacity limits adopted pursuant to this resolution.

---

\* Costa Rica, Colombia, and Peru maintain long-term capacity requests of 14,030 mt, 12,000 mt, and 12,000 mt, respectively.

11. In order to manage the fleet capacity better, the plan shall also take into account other relevant measures for managing the fishery, in particular measures [related to] [limiting] the use of fish-aggregating devices and the characteristics of fishing nets.
12. The plan shall also address the matter of the transfer of vessels included in the Regional Vessel Register among the states and REIO contemplated in this resolution.
13. Pending the development of the plan referred to in Paragraph 9, vessels included in the Regional Vessel Register may transfer to another state or REIO contemplated in this resolution with the mutual agreement of the states or REIO involved in the transfer with respect to the disposition of the corresponding carrying capacity, provided that there is no net increase in the sum of the respective capacity limits of those states or REIO.
14. As Belize and Honduras have not expressed an active interest in joining the IATTC or cooperating with the management and conservation measures adopted by the Commission, the Parties cannot continue to recognize the capacity allocations for these two states specified in the resolution of October 1998. Vessels flying the flags of these states, up to the capacity referred to in the October 1998 resolution for each of these states, may change flag to a state covered by this resolution. In such case, the capacity associated with the vessel shall be added to the capacity of the state to which the vessel is flagged.
15. From January 1, 2001, the implementation of this Resolution shall be evaluated by the Compliance Working Group.
16. The capacity levels established above shall not apply to a limit of 32 United States vessels authorized and licensed to fish in other areas of the Pacific Ocean under an alternative international fisheries management regime, and that may occasionally fish to the east of 150° West, provided that: a) the fishing activity of any such vessels in the EPO is limited to a single trip not to exceed 90 days in one calendar year; b) the vessels do not possess a Dolphin Mortality Limit; and c) the vessels carry an approved observer. A similar exception shall be considered for vessels from other countries with a similar record of participation in the EPO tuna purse-seine fishery and that meet the criteria listed above.
17. The Parties also acknowledge that France has expressed an interest in developing a tuna purse-seine fleet on behalf of its overseas territories in the EPO. Nothing in this resolution shall be considered to limit the right of France to develop such a fleet to the extent that such vessels are not operating under the jurisdiction of the European Union.

### Appendix 3.

Tuna purse-seine vessels fishing in the eastern Pacific Ocean, 26 October 2000 (IATTC data). Vessel carrying capacities are given in cubic meters of well volume (m<sup>3</sup>) and metric tons (ton). Shading indicates (a) names of vessels new to the fleet in 2000 or (b) well volumes not provided by the respective government.

Buques cerqueros atuneros pescando en el Océano Pacífico oriental, 26 octubre 2000 (datos de la CIAT). Se detallan la capacidad de acarreo de los buques en volumen de bodegas en metros cúbicos (m<sup>3</sup>) y toneladas métricas. Las casillas sombreadas señalan (b) nombres de buques nuevamente integrados a la flota en 2000 o (b) volumen de bodega no proporcionado por el gobierno respectivo.
